[1]*Masdevallia* Solar Flare, registered May 1995 but omitted from list.

Please note: This list contains registrations received to 31st December 2001. Those from 1st January 2002 onwards will appear in the next list to avoid ambiguity as to year of registration.

*New intergeneric hybrid genus with abbreviation for the following combination. The botanical authority follows each component genus.
Chinheongara C.H. Tan ex J.M.H. Shaw **nothogen. nov**. (Chi.) = *Ascocentrum* Schltr. x *Phalaenopsis* Blume x *Rhynchostylis* Blume. (Breeding group 9). This name commemorates Chin Heong Tan of Serdang Orchid Nursery Malaysia.

¤Natural genera new to registration. *Vanilla* Mill.(Vl.) New Breeding group 17.

There is a change in abbreviation for *Sophronitis* from Soph. to S. in order to bring usage in line with the other major genera within the *Cattleya*, *Laelia*, *Brassavola* group which are all represented by single letter abbreviations. This is in anticipation of the transfer of all the Brazilian *Laelia* species to *Sophronitis* being accepted for orchid hybrid registration.

¶ Species appearing for the first time as parents in registration: *Brassia jipijapensis* Dodson & N.H. Williams; *Cirrhopetalum elegans* Teijsm. & Binn.; *Coelogyne trinervis* Lindl.; *Cycnoches herrenhusanum* R. Jenny & G.A. Romero; *Cyc. peruviana* Rolfe; *Encyclia fowliei* D.I. Duveen [as *Epidendrum*, see note below]; *Epidendrum quinquepartitum* Schltr.; *Pescatorea lehmanii* Rchb.f.; *Vanilla palmarum* (Salzm. ex Lindl.) Lindl.; *Vl. planifolia* Jacks.

CORRECTIONS

***Brassolaeliocattleya* Moncho's Golden Star** appeared in the New Orchid Hybrids List with the *Orchid Review* January- February 2002 p. 3 as Monchu's Golden Star by error.

***Masdevallia* Camano Flame** appeared in the New Orchid Hybrids List with the *Orchid Review* July-August 2001 p. 8 as Camand Flame by error.

***Paphiopedilum* Ebbett's Pass** appeared in SLOH Addendum 1986-1990 p. 457 as *Paph*. Esbett's Pass by error.

***Paphiopedilum* Golden Torch** appeared in SLOH Addendum 1991-1995 p. 615 as *Paph*. Golden Touch by error.

***Phalaenopsis* Kung's Lob-Lawrence** appeared in the New Orchid Hybrids List with the *Orchid Review* January- February 2002, p.9 which listed *Phal*. Intermedia as the pollen parent. Please change this to *Phal. lobbii*. See note below.

***Phalaenopsis* Memoria Liu Jin-Chyuan** appeared in the New Orchid Hybrids List with the *Orchid Review* September-October 2000, p. 11, which listed *Phal*. Intermedia as the pollen parent. Please change this to *Phal. lobbii*. See note below.

***Wilkinsara* Dragon's Son** was by error included under *Ascocenda* in New Orchid Hybrids List p. 3 with *Orchid Review* November - December 2001.

REGISTRAR'S NOTES

Cattleya chocoensis* to be replaced by *C. quadricolor
The *Handbook on Orchid Nomenclature and Registration* (4th ed. 1993, p. 119) lists *C. chocoensis* Linden & André as a name to be used for registration purposes, however with immediate effect the alternative name with priority, *C. quadricolor* Lindl. ex Bateman, will now be used for registration. For details see *ORAC Newsletter* issue 25, which is reproduced below.

Cattleya /Laeliocattleya dormaniana. Since its discovery in the 1880's this taxon has occasioned comment for the production of extra pairs of pollinia, which has prompted the suggestion that it represents a putative natural hybrid between *Laelia* and *Cattleya*. It is now treated a s a species of *Cattleya* by most authors and is closely related to *C. guttata* and *C. leopoldii*. The removal of the Brazilian species formerly placed in *Laelia* to *Sophronitis* has prompted a review of all *Laeliocattleya* taxa with a view to determining which should remain in *Laeliocattleya* and which should be transferred to *Sophrocattleya*. This has expedited recognition of *Cattleya dormaniana* as a species for grex registration.

Dendrobium delacouri / delacourii.
The name was originally published as *delacouri* by André Guillaumin (1885-1975) in *Bulletin du Muséum d'Histoire Naturelle, Paris* p. 522 (1924). It is named for T. A. Delacour who originally collected the plant at Quangtri in Laos. According to the *International Code of Botanical Nomenclature* (2000) page 97, the specific name is formed from the personal name ending with a consonant (except -*er*), by adding -*i*- plus the genitive inflection appropriate to gender and number of the person(s) honoured, (in this case masculine, singular, which is also -*i*) so that for Lecard it becomes *lecardii*. Consequently Delacour becomes *delacourii*, and most authors correct the original published name to conform to the Code.

A new combination in Epidendrum.
Following the registration of *Encyclia fowliei* as a grex parent, a new combination is required under *Epidendrum,* as unfortunately, *Encyclia* is not yet recognised for registration. ***Epidendrum fowliei*** (D.I. Duveen) J.M.H. Shaw **comb. nov**. Basionym: *Encyclia fowliei* D.I. Duveen in *Orchid Digest* 54(1): 39 (1990). Illustration: Withner, *The Cattleyas and their relatives,* vol. 6: p.15, fig. 1-3 & plates 28, 29 (2000).

Phalaenopsis lobbii (Rchb.f.) Sweet.
This taxon has been treated formerly as *Phal. parishii* var. *lobbii* Rchb.f., and is now recognised at specific rank in Christenson's *Phalaenopsis - a Monograph* (2001) p. 68-71, [see also unnumbered colour plate,] but unfortunately it has been treated erroneously as a synonym of *Phal. x intermedia* Lindl. in the registration data base. All registrations involving *Phal*. Intermedia as a grex parent have been checked, and those which were originally submitted as *Phal. lobbii* have been changed to reflect this fact.

Paphiopedilum fairieanum / fairrieanum.
There is widespread variation in the spelling of this specific epithet. It was originally published by Lindley as *Cypripedium fairieanum* in Gardener's Chronicle 740 (1857). However, the name was intended to commemorate Mr R. Fairrie of Liverpool who first exhibited a plant before the Royal Horticultural Society in 1957. Because of this, the original spelling used by Lindley is erroneous and the name has therefore been treated as an orthographic error to be corrected to *Paph. fairrieanum*. This has been inconsistently applied in SLOH and the spelling used in the Addenda between 1961 and 1990 should be corrected to *fairrieanum*.

Vanilla planifolia Jacks.
This bimonthly period has seen the first ever registration of a primary hybrid between two species of *Vanilla*. One fact inviting investigation was the variation in botanical author citation for the species *Vl. planifolia*, which is the plant widely cultivated in the tropics as a source of vanilla flavouring. The plant was originally described by George Jackson (1790-1811) in Andrew's *Botanists Repository* vol. 8, part 111, *t.* 538, published in November 1808. George Jackson wrote the text for volumes 7 to 10, while Henry C. Andrews (1799-1830) produced the hand-coloured engraved plates, which were drawn from live plants with no herbarium material being conserved, so that the coloured plate has become the lectotype for the species. A second "edition", actually a re-issue, of the work appeared in 1816. The following citations may be seen in reference works; *Vl. planifolia* Andrews; *Vl. planifolia* G. Jackson; *Vl. planifolia* Jackson ex Andrews, or Jackson in Andrews, however these varied citations do all refer to the same taxon for which Jackson was the author. An interesting discussion of pre-and post-Linnaean nomenclature applied to this plant and the origin of the name Vanilla can be found in Kores, P. J. (1989) A precursory study of Fijian Orchids. *Allertonia* 5(1): 16-18.

The following new hybrid genera become necessary with the transfer of the Brazilian species of *Laelia* to *Sophronitis*, and the reduction of *Diacrium* Lindl. to synonymy under *Caularthron* Raf. They are published here in preparation for amendments to the hybrid database.
Calaeonitis J.M.H. Shaw **nothogen. nov**. (Can.) *Caularthron* Raf. x *Laelia* Lindl. x *Sophronitis* Lindl. (Breeding group 7).
Caulaelia J.M.H. Shaw **nothogen. nov**. (Cll.) *Caularthron* Raf. x *Laelia* Lindl. (Breeding group 7).
Sopharthron J.M.H. Shaw **nothogen. nov**. (Sot.) = *Caularthron* Raf. x *Sophronitis* Lindl. (Breeding group 7).
Sophrotes J.M.H. Shaw **nothogen. nov**. (Spt.) = *Leptotes* Lindl. x *Sophronitis* Lindl. (Breeding group 7). This nothogenus holds the three grexes formerly accommodated in *Leptolaelia.*
Stonia J.M.H. Shaw **nothogen. nov.** (Sto.) = *Broughtonia* R. Br. x *Sophronitis* Lindl. (Breeding group 7).

Julian M. H. Shaw, International Orchid Registrar
