## About

I am a landscape architect and set up Pike Studio after working and learning for 2 years with Charlotte Harris and Hugo Bugg at Harris Bugg Studio.

I am passionate about design and plants. I strongly believe in the power of landscape architecture and plants to effect positive change for both people and wildlife.

Having worked and lead a number of projects across Europe, include a large scale campus redevelopment in Berlin, a temporary garden for the Berlinale Film Festival in 2022 and large residential gardens across the UK - I feel it is now time to design my own show garden at RHS Tatton Park 2023.
