

THE INTERNATIONAL RHODODENDRON REGISTER AND CHECKLIST (2004) Cumulative List of Registered Names

Introduction to the Cumulative List

This Cumulative List contains all the Rhododendron cultivar epithets registered by the RHS since 1 January 2003. As such it represents all those published in the Supplements to *The International Rhododendron Register & Checklist* (RHS, 2004), which contained registrations only up to the end of 2002. This Cumulative List will be updated annually and will only be available as a download from the RHS website. Those wishing to check whether a name has been used before now need only use this list in conjunction with the 2004 Register and Checklist. Once the Register and Checklist are available online this Cumulative List should become redundant

In this list the “Type” indicates whether the plant is an azalea (a), an azaleodendron (az), a vireya (v) or belongs in the remainder of the genus (r). Entries in Roman type represent registered names; those in italic type represent synonyms of registered names. The number in the Supplement column refers to the published supplements where full details of each registration can be found. These are:

1 = *The International Rhododendron Register and Checklist: First Supplement* (RHS, 2006)

2 = *The International Rhododendron Register and Checklist: Second Supplement* (RHS, 2007)

3 = *The International Rhododendron Register and Checklist: Third Supplement* (RHS, 2007)
