<sup>1</sup> *Laelia* Auguste Rivière. Accompanying an application to register the grex *Laelia crispa* x *L. cinnabarina* was a photocopy of a paper in *Journal de la Societe Imperiale et Central D'Horticulture* from May 1866 in which M. Marie-Auguste Rivière, nephew of Jean-Baptiste L'Homme and Head gardener attached to the Palais de Luxembourg, Paris, describes his successful attempt to produce by cross pollination, and subsequently raise to flower, the above hybrid. Pollination was in 1857 and first flowering was in 1865, when a flowering plant was presented at a session of the Society on 24<sup>th</sup> August 1865. This means a rewriting of the history books, as Rivière carried out his cross shortly after John Dominy announced the flowering of the first artificial hybrid in the West,

*Calanthe Dominyi*, in 1856. Thus Rivière becomes the second known successful orchid hybridiser, which feat was previously attributed to a Mr Cross. However, the first known *Laelia* hybrid remains *Laelia Pilcheri* for which various different dates are given, ranging from 1864 (Bechtel *et al.*, *Manual of Cultivated Orchid Species* 1992: 28) to 1868 in Sander's List, while Rolfe and Hurst (1909: 92) provide a reference to *Gard. Chron.* 1865: 222 and *J.R.H.S* 1865: 66.

The gardens attached to the Palais de Luxembourg, Paris, known as the Jardin du Luxembourg is better known for its collection of *Paphiopedilum*. It was featured in *Jardins de France*, September 2001, p. 34-37.

<sup>2</sup> **Phal. Marmorean.** This application was made on 2<sup>nd</sup> April 1965, by R.K.Mizuta of Richella Orchids, Hawaii, and rejected because the pod parent had not then been registered. However during April 2004 a box containing all the rejected applications from the time of Jack Greatwood was discovered in the attic of the Laboratory building at Wisley. The existence of these rejected application forms was not even suspected, but since they have come to light, the opportunity has arisen to peer in to the past and accept any that are now considered to be valid.

## REGISTRAR'S NOTES

### *Calanthe*

For reasons explained by P. Cribb and C. Bailes in *Curtis' Botanical Magazine* 18(2): t. 418, 104-107 (May 2001) the correct name for *Cal. sieboldii* Decne. ex Regel is *Cal. striata* R.Br. The database has been changed to reflect this. Furthermore *Cal. bicolor* is a synonym of *Cal. sieboldii*. Unfortunately, the name *Cal. bicolor* Lindl. has been misapplied to the natural and artificial hybrid *Cal. discolor* x *Cal. striata* (syn. *sieboldii*) by several recent authors (Nakai, M. & Saigusa, T. (1975) *The genus Calanthe in Japan*. J.F. Hsiung, Taiwan; Kanda, K. (1984) *The wild orchids of Japan*. Seibundo-Shinkosha Publ. Co., Tokyo; Karasawa, K. & Ishida, G. (1998) *Calanthe*. Yasaka Shobo Inc., Japan.). This apparently leaves the natural hybrid without a botanical name. For the time being the natural hybrid will appear in the database as "*Cal. bicolor* misapplied". The artificial hybrid will appear under the Japanese name *Cal. Takane* gx. The epithet *bicolor* will no longer be used for either hybrid.

### Encyclia

The name *Encyclia aromatica* Schltr. has been replaced by *E. incumbens* (Lindl.) Mabb. For details see *Taxon* 33: 442 (1984).

### *Houlletia vittata* Lindl. replaced by *Polycycnis vittata* (Lindl.) Rchb.f.

This requires the formation of a new hybrid genus as follows: *Polygora* [Plr.] J.M.H.Shaw = *Gongora* Ruiz & Pav. x *Polycycnis* Rchb.f. Br-gp 5.

### *Masdevallia calocodon* and *Masd. yungasensis*

*Masdevallia calocodon* Luer & Vásquez (*Masd. yungasensis* subsp. *calocodon* (Luer & Vásquez) Luer) has been treated as a synonym of *Masd. yungasensis* Hashimoto in registration. However, these closely related taxa are apparently allopatric and are recognised as distinct subspecies in Vásquez, R. & Ibisch, P.L. *Orchids of Bolivia* 1: 143, 194-195, t. 100, 101 (2000). They are accordingly recognised as distinct grex parents in the register.

### Changes in *Oncidiinae*

Details and illustrations of the plants included below can be found in Zelenko, H. & Chase, M.W. (2002) *Orchids - The pictorial encyclopaedia of Oncidium*. Zai Publications, Quito, Ecuador.

### *Miltonioides* [Mds.] Brieger & Lückel

This genus has never been accepted for registration and two of the taxa assigned to it have been treated under *Miltonia* in the register. In preparation for the separation of *Miltoniopsis* [Mps.] God.-Leb. from *Miltonia* [Milt.] Lindl., these plants once treated as *Miltonia* have been transferred to *Oncidium*. Hence:

For *Miltonia schroederiana* (Rchb.f.) Veitch, (syn. *Miltonioides confusa*) See *Onc. schroederianum*

For *Miltonia warscewiczii* Rchb.f., (syn. *Miltonioides warscewiczii*) See *Onc. fuscatum*

### *Tolumnia* [Tolu.] Raf. The "Equitant" and "Variegata" *Oncidium*s.

This genus is now fully segregated from *Oncidium* in the register. There are about 1200 registered grexes in *Tolumnia* and some 90 under *Oncidumnia* (*Onc.* x *Tolu.*). The following list provides the synonyms of *Tolumnia* that were previously used in registration as *Oncidium*. ***Tolu. arizajuliana*** (syn. *Onc. arizajulianum*); ***Tolu. bahamensis*** (syn. *Onc. bahamense*); ***Tolu. berenycce*** (syn. *Onc. berenycce*); ***Tolu. calochila*** (syn. *Onc. calochilum*); ***Tolu. caribensis*** (syn. *Onc. caribense*); ***Tolu. compressicaulis*** (syn. *Onc. compressicaule*); ***Tolu. concava*** (syn. *Onc. concavum*); ***Tolu. cunelabia*** (syn. *Onc. cunelabium*); ***Tolu. gauntlettii*** (syn. *Onc. gauntlettii*); ***Tolu. guianensis*** (syn. *Onc. guianense*); ***Tolu. guibertiana*** (syn. *Onc. guibertianum*; *Tolumnia lemoniana* subsp. *guibertiana*); ***Tolu. haitiensis*** (syn. *Onc. haitiense*); ***Tolu. henekenii*** (syn. *Onc. henekenii*, *Hispaniella henekenii*); ***Tolu. leiboldii*** (syn. *Onc. leiboldii*); ***Tolu. lemoniana*** (*Onc. lemonianum*); ***Tolu. lucayana*** (syn. *Onc. lucayanum*); ***Tolu. moiriana*** (syn. *Onc. moirianum*); ***Tolu. prionochoila*** (syn. *Onc. prionochoilum*); ***Tolu. pulchella*** (syn. *Onc. pulchellum*); ***Tolu. quadriloba*** (syn. *Onc. quadrilobum*); ***Tolu. scandens*** (syn. *Onc. scandens*); ***Tolu. sylvestris*** (syn. *Onc. sylvestre*); ***Tolu. tetrapetala*** (syn. *Onc. tetrapetalum*); ***Tolu. triquetra*** (syn. *Onc. triquetrum*); ***Tolu. urophylla*** (syn. *Onc. urophyllum*); ***Tolu. variegata*** (syn. *Onc. variegatum*); ***Tolu. velutina*** (syn. *Onc. velutinum*, *Onc. variegatum* var. *velutinum*, *Onc. variegatum* subsp. *velutinum*).

### *Zelenkoa* [Zel.] M.W.Chase & N.H.Williams

This monotypic genus has also now been accepted into the register and all registrations involving *Zel. onusta* (syn. *Onc. onustum*) have been transferred to the appropriate nothogenus. (A monotypic genus is very unlikely to contain any registered grexes). A list of the new nothogenera involved is provided below.

**A nothogeneric system for *Tolumnia* and *Zelenkoa*.**

In the following list all the nothogenera currently required to accommodate existing hybrids involving these two genera are listed. Please note that some of these genera are temporary caretakers to accommodate grexes that may be moved on with further changes, such as the separation of *Miltonia* from *Miltoniopsis* and the possible absorption of *Odontoglossum* into *Oncidium*.

***Vanda coerulea* x *tricolor* and *V. suavis***

The grex *Vanda coerulea* x *tricolor* has the following established names: *Vanda* Moquetteana (1914), *V. Burgeffiana* (1915), *Vanda* Gilbert Triboulet (1919), and *V. Herziana* (made with *tricolor* var. *suavis*, 1921). *Vanda* Gilbert Triboulet (1919) was the name used by Sander that has passed into general use. It has therefore been designated as the accepted name for this grex. This also follows M.Motes, *Vandas* (1997: 42) who consistently uses *V. Gilbert Triboulet* for *coerulea* x *tricolor*, while maintaining *V. Herziana* for the *coerulea* x *tricolor* var. *suavis* cross.

*Vanda suavis* Lindl., also known as *V. tricolor* var *suavis* (Lindl.) Veitch, has been reinstated as a grex parent distinct from *V. tricolor* var. *tricolor* following requests from breeders. It is important for developing hardier lines.
