<sup>1</sup> *Cym.* *Zaleskianum*. There is some doubt as to the identity of the parental plant listed under this name. The name itself has a history of misapplication. It may be possibly either a form of *Cym. traceyanum* or a natural or artificial hybrid involving *Cym. iridioides* x *hookerianum* or *traceyanum*. See Du Puy & Cribb (2007) The genus *Cymbidium*, 2nd ed., p. 41, 236, 238.

## CORRECTIONS TO GREX REGISTRATIONS

x *Gastritis* Relief grex was registered by its originator, Henry Wallbrunn in 1981, with *Gastrochilus acaulis* as the pollen parent. Recent study of Wallbrunn's archives by Olaf Gruss has resulted in the plants grown by Wallbrunn under the name of *Gastrochilus acaulis* (Lindl.) Kuntze and used to make this hybrid, being identified as *Gastrochilus patinatus* (Ridl.) Schltr.

*Paphiopedilum* Knight's Realm. The parent of this grex appears in *Orch. Rev. Suppl.* 116(1283): 26 Sept. 2008) with the seed parent listed as Bournville gx, treated as an error for Broville gx. This was later corrected by the registrant to Bournhill gx.

*Paphiopedilum* Night Wing was registered in error as Knight Wing in *SLOH Addendum 2005–2007*: 486 (2008).

The following grex names registered by Eli Santiago need correcting by replacing the spelling Gewel with Jewel.  
x *Cattlianthe* Waxy Jewel Utuado, x *Cattleychaea* Caribbean Jewel, x *Cattlianthe* Jewels of Paradise, x *Laeliocattanthe* Living Jewel.

## REGISTRAR'S NOTES

### Increase in Orchid Hybrid registration fee.

The RHS has announced an increase in the registration fee from the present £7.50 to £10.00 per registration. This fee will come into effect from 1 January 2010. The fee has remained at the present £7.50 since June 1990.

### Additional new hybrid genera

The following genera are here established for horticultural hybrids:

x *Cyrtionopsis* [Cip.] J.M.H.Shaw = *Cyrtochilum* Kunth x *Ionopsis* Kunth

x *Parafinetia* [Prf.] J.Rosenberg\* = *Neofinetia* Hu x *Paraphalaenopsis* A.D.Hawkes

\*New author for IPNI. Julie Rosenberg, R.F. Orchids, USA.

### Implementation of the transfer of *Sophronitis* to *Cattleya* in the register

Following the publication of most of the required nomenclatural combinations by Cassio Van den Berg (*Neodiversity* 3: 3–12, March 2008), the Advisory Panel on Orchid Hybrid Registration (APOHR, now renamed ASCOHR, Advisory Subcommittee on Orchid Hybrid Registration) decided at its May 2008 meeting to adopt this new classification in the Register. An appendix dealing with the expanded concept of *Cattleya* is to be published in the forthcoming volume 5 of *Genera Orchidacearum* which is due in March 2009. At about the same time, the Kew World Monocots Checklist is expected to be released in a new version incorporating all these nomenclatural changes. Implementation of this change, in which all taxa previously ascribed to the genera *Cattleyella* and *Sophronitis* are transferred to *Cattleya*, requires changes to about 25,000 records in the Register of orchid hybrids. The overall effect is to reduce the number of hybrid genera used in this group. However, a number of new hybrid genera are required for some hybrid combinations that now include *Cattleya* but exclude *Sophronitis*. Consequently the following new hybrid genera are here established for horticultural hybrids.

### New combinations in *Cattleya*

Combinations in *Cattleya* for a number of natural hybrids have yet to be published. In order to use names in the register the following minimum of two new combinations is here validated.

***Cattleya x irrorata*** (Rchb.f.) J.M.H.Shaw **comb. nov.** Basionym: *Laelia x irrorata* Rchb.f., *Hamburger Garten- Blumenzeitung* 15: 57 (1859). This is apparently the oldest available name for the natural hybrid *Cattleya purpurata* × *Cattleya intermedia*, which was previously known as x *Sophrocattleya schilleriana* (Rchb.f.) Van den Berg & M.W.Chase, *Lindleyana* 16: 111 (2001), based on *Laelia x schilleriana* Rchb.f., *Allg. Gartenzeitung* 23: 323 (1855). This older name cannot be recombined in *Cattleya* since this is occupied by *Cattleya schilleriana* Rchb.f., *Allg. Gartenzeitung* 25: 335 (1857).

***Cattleya x eximioides*** J.M.H.Shaw **nom. et comb. nov.** Replaced name: x *Laeliocattleya eximia* H.J.Veitch, *Gard. Chron.* 1890(1): 800; *Orch. Rev.* 1893: 292; *Lindenia* 9: t. 386; Fowlie, *Brazilian bifoliate Cattleyas* 43 (1977). Syn. × *Sophrocattleya eximia* (H.J.Veitch) hort, *Journ. Hort. Pract. Gard.* 1894: 321 (1894). The name is applied to the hybrid *Cattleya warneri* × *C. purpurata*. The epithet *eximia* has been used previously in *Cattleya*, as *Cattleya eximia* Barb.Rodr. *Gen. & Sp. Orch. Nov.*, 1: 70 (1877), which is a synonym of *Cattleya x dolosa* (Rchb.f.) Rchb.f., *Xenia Orchid.* 2: 224 (1874), possibly a natural hybrid of *C. loddigesii* × *C. walkeriana*.

### Confusion surrounding *Cattleya x resplendens*

*Sander's List of Orchid Hybrids Addendum 2005–2007* p.66 lists two separate entries under *Cattleya* using the epithet *resplendens* each with one common parent as *C. schilleriana*, but combined with another different parent. The confusion seems to have arisen because some sources, including the Kew World Monocot Checklist (WMCL), list one seed parent as *C. granulosa* while some other sources such as Fowlie, *Brazilian bifoliate Cattleyas*: 43 (1977) list it as *C. schofieldiana*. At one time, *C. schofieldiana* was named *C. granulosa* var. *schofieldiana*. The original publication in *Gardener's Chronicle* 1885(1): 692, does not indicate var. *schofieldiana* to be the parent. Since the WMCL recognises both *C. granulosa* and *C. schofieldiana* at species rank, the parentage it give for *C. x resplendens* could be adjusted if necessary. However, Fowlie provides no comment or evidence for the parentage he lists.

*Cattleya Resplendens* is listed in SLOH 1946 ed. with *C. guttata* as seed parent, this is apparently an error for *C. granulosa*, and should be amended to *C. granulosa*.

*Cattleya Kerchoveana*, also spelled *Kerchoviana*, is attributed to Cogniaux in *Gardener's Chronicle* 29 (May 25th Suppl.): 1 (1901), which lists the parentage as *C. granulosa* var. *schofieldiana* × *C. schilleriana*. The recently published hybrid *C. x schunkii* V.P. Castro in *Richardiana* 8(3): 100–103 (2008) was intended to provide a botanical name for the hybrid *C. schofieldiana* × *C. schilleriana*, but it is invalid as no Latin description was provided. It is evidently a synonym of *C. Kerchoveana*. The occurrence of this cross as a natural hybrid seems doubtful as the species do not appear to co-exist in the wild.

*Cattleya Peckaviensis* is listed as a synonym of *C. Resplendens* in *SLOH Addendum 2005–2007*: 66. This appears to be a further error traceable to early editions of SLOH. *Cattleya Peckaviensis* is not a synonym of *C. x resplendens*, because it represents the hybrid *C. aclandiae* × *C. schilleriana*, as stated in *Wien Ill. G. Zeit.* 1901: 431, f.52, and repeated in Rolfe & Hurst, *The Orchid Studbook*: 65 (1909). The hybrid is attributed to Baron Hruby of Austria in 1901. The entry in SLOH attributes this hybrid to Marriott, 1910, with the spelling *Peckhaviensis*, evidently an error.

According to Mr A.E. Allen of Australia, who kindly brought the above matter to the Registrar's attention, the plant used as seed parent to make Mareeba Sunshine grex, which appears in printed copies of SLOH as *C. Resplendens*, is actually a hybrid of his own making (*C. leopoldii* [now *C. tigrina*] × *C. schilleriana*). The name *C. Mareeba Tiger* has been established for this grex.
