The International Dianthus Register (1983) & Checklist

Twenty-sixth Supplement

Introduction	page 1
Additions (January to December 2008)	page 3
Corrections to the Register & Checklist	page 59
List of raisers and registrants	page 60

The following list contains the names of *Dianthus* cultivars added to the International Dianthus Register between 1 January and 31 December 2008, together with any additions to the Checklist where relevant information about the plants concerned has become available.

Raisers and introducers of cultivars of *Dianthus* are urged to ensure that the names of all their plants have been registered and are reminded that registration should take place *before* a plant is released or the name is mentioned in print. Registration concerns *all* named cultivars. Registration forms can be obtained from the International Dianthus Registrar at the address below. A certificate of registration will be issued on request. There is no fee for this service. The form may also be downloaded from the RHS website at: www.rhs.org.uk/plants/Plant-science/Plant-registration/Dianthus

The format of entries follows a pattern first adopted in the Fifth Supplement, except that pot carnations are now designated as (pt) at the start of their entries. Following the classification and name of each new cultivar is a statement regarding parentage or origin in parentheses. The names of those involved in the raising, introduction and registration of the plant are then listed, together with the relevant dates. It may be helpful here to repeat the abbreviations that are employed in the text:

(b)	border carnation	(p)	pink
(c)	carnation	(p,a)	annual pink or pink usually grown as annual
cv.	cultivar		
G	grown to first flower by	(pf)	perpetual carnation
Gp	Group	(pt)	pot carnation
H	hybridised by	R	raised by
I	introduced by	REG	registrant
L	listed by	S	selected by
(m)	malmaison carnation	(s)	seed parent
N	named by		

Perpetual carnations are listed, where known, as sprays or standards. The use of the latter should not be confused with the citation of nomenclatural standards which refer to the

individual herbarium specimen or image (slides, prints, etc.) which have been selected as the definitive point of reference should any doubt arise about the plant to which the name concerned should apply.

Colour references such as 128D are to the *RHS Colour Chart* (1966, 1986, 1995, 2001); those such as 730/3 refer to the *Horticultural Colour Chart* (1941). The descriptions are as full and consistent as information provided by the registrant and other sources allow. Any additional material would be welcomed by the Registrar.

Corrections to the International Register & Checklist

(b) 'Jill Ann'

cf. *The International Dianthus Register & Checklist*, second edition, twentieth supplement, p.7 (2003). The granddaughter of the raiser, Jill Anne Merrilees, after whom this cultivar is named, indicates that this entry and the entry for the same plant in *The International Dianthus Register*, second edition, p.237 (1983) should both be spelt 'Jill Anne' to reflect the correct spelling of her name. Her grandfather was incorrect in 2002 in indicating that 'Jill Ann' was the correct spelling.

(pf) 'Nora Urling Clark'

cf. *The International Dianthus Register*, second edition, p.376 (1983). The correct spelling is 'Norah Urling Clark': it is named for Lady Norah Urling Clark, wife of the raiser.
