CORRECTIONS

***Brassolaeliocattleya* Boy's Grotto (syn. Palace Blue Lavender grex)**

A duplicate registration has been discovered for the hybrid *Lc.* Blue Boy x *Blc.* Blue Grotto. The name *Blc.* Boy's Grotto (Kokusai, 1995) has priority over *Blc.* Palace Blue Lavender (Orchid Palace, 2005) which now becomes a synonym.

REGISTRAR'S NOTES

Cattleya leopoldii* and *C. tigrina

The name *Cattleya tigrina* A.Rich. (1848) has date priority over *C. leopoldii* Verschaff. ex Lem. (1854) and consequently has been adopted as the correct name for this species in the register. For a discussion and synonyms see Braem, G.J. (1984) *Cattleya* 1: 74-79. This follows the World Monocots Checklist which may be consulted at <http://www.rbgekew.org.uk/wcsp/qsearch.do> [enter *Cattleya tigrina* in the search box]

***Chaubardia heteroclita* (Poepp. & Endl.) Dodson & D.E.Benn.**

During registration of a grex with this species as a parent it came to light that this taxon was represented in the register under several names, including *Huntleya heteroclita* (Poepp. & Endl.) Garay and *Zygopetalum rhombilabium* C.Schweinf. Subsequent investigation revealed that the currently accepted placement is in *Chaubardia* Rchb.f. As a result the following grexes have been transferred to other genera:

Chet Goddard (1979) from *Zygopetalum* to *Zygobardia* nothogen. nov. [Zbd.] = *Chaubardia* Rchb.f. x *Zygopetalum* Hook.

Gary Baker (1991) from *Huntleyanthes* to *Cochardia* nothogen. nov. [Ccr.] = *Chaubardia* Rchb.f. x *Cochleanthes* Raf.

Heter Beauty (2003) from *Pescantleya* to *Davidhuntara* [Dvh.] = *Chaubardia* Rchb.f. x *Cochleanthes* Raf. x *Pescatoria* Rchb.f.

Moyobamba (1994) from *Huntleyanthes* to *Cochardia*

Chaubardiella chasmatochila (Fowlie) Garay is regarded as a synonym of *Chaubardiella subquadrata* (Schltr.) Garay and has been replaced by it as a grex parent. This involves a change of parentage for *Steniella* Hoosier Honey (1997) and *Keferella* Rubella (2003).

***Epidendrum erectum*, *evectum* and the parentage of *Epi. O'Brienianum* grex**

Following a query on the parentage of the hybrid known both as *Epi. O'Brienianum* grex and *Epi. x obrienianum* Rolfe, it has come to light that the name *Epidendrum erectum* used in the Register is an orthographic error for *Epi. evectum* Hooker in *Bot. Mag.* 97: t. 5902 (1871). Evectum means 'to spring forward' and seems to have been supplanted by erectum in the *Sander's List 1946 - 1960* (1961: 737). It is easy to see how this mistake could occur as these two epithets appear similar if handwritten. However, the name *Epi. evectum* is itself predated by *Epi. jamiesonis* Rchb.f. in *Bonplandia* 4: 327 (1856), and consequently this is the accepted name for one of the parents of *Epi. O'Brienianum* grex.

The other parent was originally listed as *Epi. radicans* Pav. ex Lindley, but at times this has been regarded as a synonym of *Epi. ibaguense* H. B. & K. This is the view taken by Luer in *The native orchids of the United States and Canada* (1975: 288), and subsequently followed in Wagner, W.L., Herbst, D.R. & Sohmer, S.H. (1990: 1472) *Manual of the Flowering Plants of Hawai'i*. However, the name *Epi. radicans* is retained in the Register as it is now once again accepted at species rank. It seems likely that the reference to *Epi. radicans* as naturalized in Florida in *Flora of North America* 26: 493 (2002), refers to this hybrid which is now also naturalized in parts of Hawaii.

The hybrid was first described by R.A.Rolfe in *Gardener's Chronicle* 1888(1): 770, 771, f.103 as *Epidendrum* "O'Brienianum x, n.hyb." and provides an example of a name with a double life. For a cultivated plant this serves as a grex name and under the ICNCP the epithet can retain the original orthography. However, this publication is also valid botanically and under the ICBN the epithet must be modified by removal of the capitals and the apostrophe, resulting in the *x obrienianum* version as used in botanical works. Both names refer to the same plant from different perspectives.

Another version of the name, *Epi. "xO'Brienianum"* appears in the recent *Genera Orchidacearum* 4: 250 (2005), which does not appear to satisfy the requirements of either code of nomenclature.

It should be noted that these two versions of the same name have slightly different applications and cannot be used together.

The botanical hybrid name applies to all possible hybrid combinations between the original two parental species and their progeny, including back-crosses, such as would be encountered in a wild hybrid population. Whereas the horticultural grex name can only be applied to the primary hybrid between the two parental species, the reciprocal cross, and sibling crosses (line-breeding), any back-crosses of the hybrid with either parent would require a new grex name. Consequently, the situation can arise where a botanical hybrid name can include a number of grex names. For example, *Epi. Thayeri* grex is the back-cross *Epi. O'Brienianum* x *Epi. radicans*, therefore the botanical concept *Epi. x obrienianum* Rolfe includes the grexes *Epi. O'Brienianum* and *Epi. Thayeri*. While it is quite acceptable to write *Epi. x obrienianum* Thayeri gx, it is not permissible under ICNCP Art. 19.18 to use *Epi. x obrienianum* O'Brienianum gx, under such circumstances a new replacement name would have to be established for the grex *Epi. O'Brienianum*.

Oncidium guttatum

It has been kindly pointed out that *Tolumnia tetrapetala* (Jacq.) Braem, which is based on *Epidendrum tetrapetalum* Jacq. (1760), syn. *Oncidium tetrapetalum* (Jacq.) Willd., is a synonym of *Tolumnia guttata* (L.) M.A.Nir, which is based on *Epi. guttatum* L. (1753), syn. *Oncidium guttatum* (L.) Rchb.f. Consequently, all these names have been synonymised under *Tolumnia guttata* in the Register.

A new combination in *Psytonia*

Following the reduction of *Laeliopsis* Lindl. and *Cattleyopsis* Lem. to *Broughtonia* R.Br., (see references in *Gen. Orch.* 4: 210-213, 2005) a new combination is required for the natural hybrid between *Psychilis olivacea* and *Broughtonia domingensis* (syn. *Laeliopsis domingensis*). The genus *Psytonia* [Pyt.] = *Broughtonia* × *Psychilis* was established in *Orch. Rev. Suppl.* 112(1257): 46 (May 2004).

×***Psytonia yumanensis*** (Withner) J.M.H.Shaw comb. nov. Basionym: ×*Epilopsis yumanensis* Withner in *Amer. Orch. Soc. Bull.* 40: 1985 (1971). Syn. ×*Laelichilis yumanensis* (Withner) Saulea in *Phytologia* 65: 28 (1988).

The hybrid is illustrated in Withner, *The Cattleyas and their relatives* 4: plate 57 (1996).

Unregistered hybrids of *Quisqueya* [Qui.]

According to Withner, *Cattleyas* 4: 108- 110 (1996) there have been at least two intergeneric hybrids produced using the little known genus *Quisqueya* Dod. Accordingly hybrid genera are proposed for these as follows:

Quisavola [Qvl.] = *Brassavola* R.Br. × *Quisqueya* Dod, based on *Brassavola nodosa* × *Quisqueya rosea*, produced by Donald Dod at the Santo Domingo Botanical Garden.

Quischilis [Qch.] = *Psychilis* Raf. × *Quisqueya* Dod, based on *Psychilis olivacea* × *Quisqueya ekmanii*, also produced by Dod and illustrated in Gottschalk, A. (1981) *Bol. Jard. Bot. Nac. [Dominica]* 5(2): 10-11.
