* New hybrid genus (with abbreviation in brackets).

The following new hybrid genera are here validated:

x *Watanabeara* [Wtb.] K.Watanabe ¹ = *Cochlioda* Lindl. x *Comparetia* Poepp. & Endl. x *Oncidium* Sw.

New botanical authors noted for IPNI: ¹Kazuo Watanabe, Tokorozawa, Japan.

¶ Species new to registration: *Arachnis longisepala* (J.J.Wood) Shim, Soón & A.L.Lamb; *Bulbophyllum arfakianum* (Lindl.) Lindl.; *Bulbophyllum mandibulare* Rchb.f.; *Bulbophyllum grandiflorum* Kraenzlin; *Calanthe madagascariensis* Rolfe ex Hook.f.; *Dracula amaliae* Luer & R.Escobar; *Dendrobium hamaticar* J.J.Wood & Dauncey; *Dendrobium lampongense* J.J.Sm.; *Masdevallia lucernula* Königer; *Masdevallia schimdt-mummii* Luer & R.Escobar; *Phragmipedium andreettae* P.Cribb & F.Pupulin.

CORRECTIONS TO GREX REGISTRATIONS

The record for x *Rhynchumnia* Cape Dance registered by Duckitt Nursery, South Africa in 2007, and published in *SLOH Addendum 2005–2007*: 775 (2008), requires some corrections due to a labelling error. It should be changed to read: x *Oncidumnia* Cape Dance = *Tolumnia* First Love x *Oncidium cheiophorum*.

Due to a misunderstanding, the grex *Masdevallia* Grace Emily appeared with the wrong seed parent (*Masd. cyclotega*) in *Orch. Rev. Suppl.* 116(1283): 23 (Sept. 2008), and also *The Orchid Review* 116(1283): 248 (Sept. 2008). The correct seed parent is *Masdevallia* Myra grex. Conversely x *Dracuvalia* Maddison White appeared on p21 with the wrong seed parent (*Masdevallia* Myra grex) which should be changed to read *Masdevallia cyclotega*.

The registration that appeared as x *Psycia* Maritza (*E. tampensis* x *Psy. atropurpurea*) in *Orch. Rev. Suppl.* 116(1282): 10 (Jul 2008) has been revised by the registrant to read x *Psycia* Maritza Bielecki (*E. Cindy* x *Psy. atropurpurea*).

A white-flowered plant of *Stanhopea* grown at the Eric Young Orchid Foundation under the name *Stanhopea platycera* f. *gunnii* 'Alba' has been redetermined as *Stanhopea maduroi* Dodson & Dressler. This has required a change of parentage in the grex register for *Stanhopea* Augres grex which now has the parentage *Stanhopea connata* x *Stan. maduroi*.

The name *Cymbidium* Pinata (Sonoma Red x Mighty Firefall) was accepted in error and appeared in the last *Orch. Rev. Suppl.* 116(1283): 18 (Sept. 2008). It should be corrected to read Pinata Royale as it is too similar to *Cym. Piñata* (Tethys x Khyber Pass, 1978), with which it will be confused.

CORRECTION TO HYBRID GENUS

x *Cyrtodontioda* [Cdo.] J.M.H.Shaw = *Cochlioda* Lindl. x *Cyrtorchilum* Kunth x *Odontoglossum* Kunth. This hybrid genus was not validly published in *Orch. Rev. Suppl.* 116(1283): 34 (Sept. 2008) due to a typographical error, where it appeared as x *Cyrtodontella*.

REGISTRAR'S NOTES

A re-evaluation of "x *Phalandopsis*" Arizona Star grex

Plants under the name of x *Phalandopsis* Arizona Star 'Jim Turnbow' have been around for quite some time. Whenever, they have been shown for judging they usually become a focus of controversy concerning their parentage. Registered as *Vandopsis gigantea* x *Phalaenopsis amabilis* in 1985 with an unknown originator, the lip of this plant does not appear to be as expected if a *Phalaenopsis* were really an ancestor. After careful scrutiny by several AOS judges co-ordinated by Ron McHatton it is suggested that this is a cross between *Renanthera bella* and *Vandopsis gigantea*, which would place this plant in x *Renanopsis*. Acceptance of this parentage results in several changes in the register.

1 x *Renanopsis* Naohiro Ando has been registered for the hybrid *Renanthera bella* x *Vandopsis gigantea*. Consequently, Arizona Star grex although an older name, because of uncertainty surrounding its parentage and origin, may be best treated as a synonym.

2 Arizona Star grex is a parent of 3 other registered grexes.

x *Ernestara* Fire Storm (Arizona Star x *Renanthera monachica*) becomes a x *Renanopsis*.

The two other hybrids remain as x *Ernestara* because they involve *Phalaenopsis* as the other parent.

3 The unregistered cross (x *Renanopsis* Fire Storm x *Paraphalaenopsis* Sunny) for which the nothogenus x *Huntingtonara* was published becomes a x *Renanparadopsis*.

A further new hybrid genus in the *Maxillariinae*

With the recognition of the *Maxillaria auyantepuiensis* complex, also known as the *Maxillaria desvauxiana* clade, as the small genus *Mapinguari*, consisting of four species primarily from the Guayanian and Amazonian regions, a further new hybrid genus is required to accommodate horticultural hybrids.

x *Mapingucaste* [Map.] J.M.H. Shaw = *Lycaste* Lindl. x *Mapinguari* Carnevali & R.Singer.

Odontoglossum gloriosum and *Odm. odoratum*

For some time, *Odontoglossum gloriosum* Rchb.f. has been treated in registration as a synonym of *Odm. odoratum* Lindl. However, Bockmühl's 1989 revision of *Odontoglossum* recognised these taxa as distinct, as does the Kew World Monocots Checklist. Consequently, a registration has recently been accepted with *Odm. gloriosum* as a parent. For consistency, the registered parentage of x *Odontioda* Loochristiensis (*The Orchid Review* 23: 148, 1915) has also been changed to *Cochlioda noezliana* x *Odm. gloriosum*.

Central American *Phragmipedium* names in the register

There does appear to be some confusion about the names to use for *Phragmipedium* occurring wild in Central America. After consultation, the following names are being used in the register.

For plants with a staminode the name *Phrag. exstaminodium* is used, and for plants without a staminode *Phrag. popowii*, including plants from Guatemala used as grex parents by Carson Barnes and plants used by Orchids (MN) Ltd, which have prior to this been included in *Phrag. warscewiczianum*. In the following four grex registrations, the parent *Phrag. warscewiczianum* should be changed to read *Phrag. popowii*:

Mini Grande gx

Alien Syndrome gx

Stairway to Heaven gx

Predator gx

A change of author citation for *Vanda*

Four Sanskrit vernacular names had been taken from a list appearing in Sir William Jones' paper: Botanical observations on select Indian plants in *Asiatick Researches* 4: 237–312 (1795) and listed as genera in *Index Kewensis*, yet none were proposed as Linnean names by Jones, and should not be treated as such. (They are *Syama* p261 = *Pupalia* Juss.; *Saivala* p275 = *Blyxia* Nor.; *Cuvera* p281 = *Cedrela* P.Br., and *Vanda*.) Only *Vanda* is in current use and usually cited as *Vanda* Jones ex R.Br. It should be cited as *Vanda* R.Br. in *Bot. Reg.* 6: t.506. 1820. I am grateful to Lawrie Springate of the Royal Botanic Garden Edinburgh for bringing this to my attention.

Tahitian *Vanilla* is a grex

Recent molecular work by Lubinsky, P. *et al.*, in *American Journal of Botany* 95(9): 1040–1047 (2008), has shown that the plant treated as a species, *Vanilla tahitensis*, is an early hybrid of *Van. planifolia* x *Van. odorata*. 'Haapape' is a cultivar of this hybrid.

Establishment of cultivar epithets

***Disa* Kewensis** gx 'Richies Gold' Selected and named by Tom Watson, UK.

Description: Flower 4.5cm across, Dorsal sepal 3cm wide x 2.5cm long, pale yellow to primrose with pinky-red spots. Lateral sepals diffused orange-yellow.

LIST OF HYBRID GENERA AVAILABLE

A complete list of orchid hybrid genera with components as currently used in registration and reproduced in the newly published *Sander's List of Orchid Hybrids Addendum 2005–2007* (May 2008) is now available as a free downloadable document from RHS Online (http://www.rhs.org.uk/plants/registration_orchids.asp).

Scroll down the page to find the links:
