The International Dianthus Register (1983) & Checklist

Twenty-seventh Supplement

Introduction	page 1
Additions (January to December 2009)	page 3
Corrections to the Register & Checklist	page 42
List of raisers and registrants	page 43

The following list contains the names of *Dianthus* cultivars added to the International Dianthus Register between 1 January and 31 December 2009, together with any additions to the Checklist where relevant information about the plants concerned has become available.

Raisers and introducers of cultivars of *Dianthus* are urged to ensure that the names of all their plants have been registered and are reminded that registration should take place before a plant is released or the name is mentioned in print. Registration concerns all named cultivars. The forms to register a new name can be obtained from the International Dianthus Registrar at the address below. A certificate of registration will be issued on request. There is no fee for this service. The form may also be downloaded from the RHS website at: www.rhs.org.uk/plants/Plant-science/Plant-registration/Dianthus

The format of entries follows a pattern first adopted in the Fifth Supplement, except that pot carnations are now designated as (pt) at the start of their entries. Following the classification and name of each new cultivar is a statement regarding parentage or origin. The names of those involved in the raising, introduction and registration of the plant are then listed, together with the relevant dates. It may be helpful here to repeat the abbreviations that are employed in the text:

(b)	border carnation	(p)	pink
(c)	carnation	(p,a)	annual pink or pink usually grown as annual
cv.	cultivar	(pf)	perpetual carnation
G	grown to first flower by	(pt)	pot carnation
Gp	Group	R	raised by
H	hybridised by	REG	registrant
I	introduced by	S	selected by
L	listed by	(s)	seed parent
(m)	malmaison carnation		
N	named by		

Perpetual carnations are listed, where known, as sprays or standards. The use of the latter should not be confused with the citation of nomenclatural standards which refer to the

individual herbarium specimen or image (slides, prints, etc.) which have been selected as the definitive point of reference should any doubt arise about the plant to which the name concerned should apply.

Colour references such as 128D are to the *RHS Colour Chart* (1966, 1986, 1995, 2001); those such as 730/3 refer to the *Horticultural Colour Chart* (1941). The descriptions are as full and consistent as information provided by the registrant and other sources allow. Any additional material would be welcomed by the International Registrar.

The Registrar would like to take this opportunity to thank those recent correspondents who have been so helpful in providing information about entries in this supplement, especially Sandra Medina (S.B. Talee), Salome Morlanes (Barberet & Blanc) and Clasine Feith (HilverdaKooij). Syd Wilson (British National Carnation Society historian) has also continued to provide advice and encouragement which is much appreciated.

cv. Parentage unknown

R: D.H. Portman (pre2009)

Fls single, 45mm wide, white ground, with a large dark red eye (with a "toothed" outer margin), laced slightly paler red, with a very narrow white rim, the central patch of ground colour almost covered by an irregular horizontal bar of pink; margins entire or very shallowly toothed. Lvs blue-green. Stems 40cm.

(Nomenclatural standard: colour print (WSY0112858). Etymology: named after the composer Wolfgang Amadeus Mozart, reflecting the raiser's strong interest in classical music; "Kessock" is part of the raiser's address

(p) **'Kessock Artist'**

cv. Parentage unknown

R: D.H. Portman (pre2009)

Fls single, 40mm wide, white ground, with a dark red eye (with a shortly "toothed" outer margin), laced a similar colour which shades paler towards the margin and with a very narrow white rim, the remainder of the petal white with an irregular horizontal bar of pink across the centre; margins very shortly toothed. Lvs blue-green. Stems 30cm.

Nomenclatural standard: colour print (WSY0112855). Etymology: "Kessock" is part of the raiser's address

cv. Parentage unknown

R: D.H. Portman (pre2009)

Fls single, 40mm wide, deep pink ground, with a dark red eye (with a "toothed" outer margin), the lacing much the same colour, with just the suggestion of a very pale rim and paler markings along the margins of the central area of ground colour; margins entire. Stems 35cm.

Nomenclatural standard: colour print (WSY0112856). Etymology: named for a granddaughter of the raiser; "Kessock" is part of the raiser's address

(p) **'Kessock Julie Portman'**

cv. Parentage unknown

R: D.H. Portman (pre2009)

Fls single, pink ground, with a deep red eye (only slightly "toothed" on the outer margin), with a broad halo of white outside the eye; margins moderately toothed. Stems 30cm.

Nomenclatural standard: colour print (WSY0112853). Etymology: named for

one of the raiser's daughters; "Kessock" is part of the raiser's address

(p) **'Kessock Red Cloud'**

cv. Parentage unknown

R: D.H. Portman (pre2008)

Fls single, 40mm wide, white ground, with a dark red eye, slightly paler lacing and a band of the darker colouring up the centre of each petal dividing the white ground; margins untoothed. Lvs silvery green. Stems 35cm.

Nomenclatural standard: colour print (WSY0112854). Etymology: "Kessock" is part of the raiser's address

(p) **'Kessock Rose Blush'**

cv. Parentage unknown

R: D.H. Portman (pre2008)

Fls single, 45mm wide, white ground, with a prominent dark red eye (the outer margin of which is shortly "toothed"), the ground blushed pink with the colour strongest in a blotch across the centre of each petal and fading slightly with age; margins shallowly to moderately and sharply toothed. Lvs pale greyish green. Stems 40cm.

Syn: 'Kessock Big Blush'

Nomenclatural standard: colour print (WSY0112851). Etymology: "Kessock" is part of the raisers's address

(p) **'Kessock Teresa Portman'**

cv. Parentage unknown

R: D.H. Portman (pre2009)

Fls single, 45mm wide, white ground, with deep red eye (slightly "toothed" on the outer rim), surrounded by a very narrow pale band, with a large deep pink blotch on each petal which has a conspicuously "toothed" outer rim; margins deeply and sharply toothed. Lvs pale grey-green. Stems 35cm.

Nomenclatural standard: colour print

(WSY0112852). Etymology: named for an aunt of the raiser; "Kessock" is part of the raiser's address
