# The International Dianthus Register (1983) & Checklist

## *Twenty-eighth Supplement*

Introduction	page 1
Additions (January to December 2010)	page 3
List of raisers and registrants	page 30

The following list contains the names of *Dianthus* cultivars added to the International Dianthus Register between 1 January and 31 December 2010, together with any additions to the Checklist where relevant information about the plants concerned has become available.

Raisers and introducers of new cultivars are urged to ensure that the names of all their plants have been registered and are reminded that registration should take place before a plant is released or the name is mentioned in print. Registration concerns all named cultivars. The forms to register a new name can be obtained from the International Dianthus Registrar at the address below. A certificate of registration will be issued on request. There is no fee for this service. The form may also be downloaded from the RHS website at: [www.rhs.org.uk/plants/Plant-science/Plant-registration/Dianthus](http://www.rhs.org.uk/plants/Plant-science/Plant-registration/Dianthus)

The format of entries follows a pattern first adopted in the Fifth Supplement, except that pot carnations are now designated as **(pt)** at the start of their entries. Following the classification and name of each new cultivar is a statement regarding parentage or origin. The names of those involved in the raising, introduction and registration of the plant are then listed, together with the relevant dates. It may be helpful here to repeat the abbreviations that are employed in the text:

<b>(b)</b>	border carnation	<b>(p)</b>	pink
<b>(c)</b>	carnation	<b>(p,a)</b>	annual pink or pink usually grown as annual
<b>cv.</b>	cultivar	<b>(pf)</b>	perpetual carnation
<b>G</b>	grown to first flower by	<b>(pt)</b>	pot carnation
<b>Gp</b>	Group	<b>R</b>	raised by
<b>H</b>	hybridised by	<b>REG</b>	registrant
<b>I</b>	introduced by	<b>S</b>	selected by
<b>L</b>	listed by	<b>(s)</b>	seed parent
<b>(m)</b>	malmaison carnation		
<b>N</b>	named by		

Perpetual carnations are listed, where known, as sprays or standards. The use of the latter should not be confused with the citation of nomenclatural standards which refer to the individual herbarium specimen or image (slides, prints, etc.) which have been selected as

the definitive point of reference should any doubt arise about the plant to which the name concerned should apply.

Colour references such as 128D are to the *RHS Colour Chart* (1966, 1986, 1995, 2001); those such as 730/3 refer to the *Horticultural Colour Chart* (1941). The descriptions are as full and consistent as information provided by the registrant and other sources allow. Any additional material would be welcomed by the International Registrar.

The Registrar would like to take this opportunity to thank those recent correspondents who have been particularly helpful in providing information about entries in this supplement, especially Sergio Santamaria (Santamaria), Clasine Feith (HilverdaKooij) and Laetitia Moucheboeuf (Whetman Pinks). The continued advice and encouragement provided by the British National Carnation Society historian, Syd Wilson, is also gratefully acknowledged.
