REGISTRAR'S NOTES

***Cymbidium erythraeum* Lindl. and *Cym. longifolium* misapplied.**

The registration of *Cym. erythraeum* Lindl. as a grex parent has revealed that it has been masquerading in the data base under the misapplied name *Cym. longifolium*, which name is properly a synonym of *Cym. elegans* Lindl. As a result the following two grexes need to have their parentage corrected *Cym. Avdeew* (1976); *Cym. Gammieanum* (1895).

Cym. × gammieanum King & Pantling is a putative natural hybrid known from Sikkim, regarding which, the parentage is accepted as *Cym. elegans* × *Cym. erythraeum* for registration, following Cribb & Du Puy (1988: 147). Based on cytology, Vij and Shekhar (*J. Orchid Soc. India* 1: 29-43, 1987) have suggested that the parents are *Cym. elegans* × *Cym. iridoides*. See Cribb, P. & Du Puy, D. (1988) *The genus Cymbidium*. Christopher Helm, London & Timber Press, Portland. p.118-119, photo. 88, 89 on p. 225. Hara, H., Stearn, W. T. & Williams, L. H. J. ***Cypripedium speciosum* Rolfe replaced with *Cyp. macranthos* Sw.**

In order to bring the names of *Cypripedium* species accepted for registration in to line with Cribb, *The genus Cypripedium* (1999), the synonymy given on page 197 under *Cyp. macranthos* has been adopted. This means that *Cyp. speciosum* is now viewed as a synonym of *Cyp. macranthos* with the following grex synonyms resulting.

Cyp. Carolin (1991) syn: *Cyp. Tanja Pinkepank* (1999)

Cyp. Philipp (1996) syn: *Cyp. Francis* (2001)

Cyp. Maria (1991) syn: *Cyp. Gisela* (1992).

***Epidendrum atropurpureum* hort. replaced by *Epi. cordigerum* (HBK) Foldats**

Although the name *Epidendrum atropurpureum* hort. is no longer accepted as a grex parent, as it is a misidentification of *Epi. cordigerum* (*Encyclia cordigera*), over 100 records persisted in the data base for registrations prior to 1984. These records have resulted in five cases of double registrations, two of which have been kindly pointed out by users of the web page grex search. To avoid further confusion all registrations prior to 1984 involving *Epi. atropurpureum* hort. as a grex parent have been changed to read *Epi. cordigerum*. This has resulted in the following grex synonyms.

Brassoepidendrum Arubiana (1950) syn: *Bepi. Megan* (1997)

Epi. Atropine (1962) syn: *Epi. Green Glades* (1986)

Epi. Gail Nakagaki (1955) syn: *Epi. Butch Luce* (1983)

Epi. Imon (1963) syn: *Epi. Dixie Darling* (1984)

Yamadara Tyl Eulenspiegel (4th March 1982) syn.: *Yam. Misty Willow* (20th Sept. 1982)

***Habenaria* Willd. / *Pecteilis* Raf.**

Accepting the generic treatment of the *Habenaria* group in *Genera Orchidacearum* 2: 298-303, 339, 345 (2001), the following changes have been implemented: *Pecteilis* Raf. (Abbreviation: Pec.) has been separated from *Habenaria* Willd. *Blephariglottis* Raf. transferred as a synonym from under *Habenaria* to *Platanthera* Rich. (Abbreviation: P.)

The nothogenus *Pectabenaria* A.D. Hawkes, *Orchids* 244 (1961), (Abbreviation Pe.) = *Habenaria* Willd. x *Pecteilis* Raf. is now accepted for registration, and the following two grexes are now listed under it.

Pe. Original, formerly: *Hab.* Original (1912)

Pe. Yokohama, formerly: *Hab.* Yokohama (1956).

And one adjustment of a natural hybrid name: *P. x andrewsii* (White in Niles) Luer (1975) syn: *Hab. x andrewsii* White in Niles (1904).

Lycaste guatemalensis* Archila and *Lyc. ipala

Lycaste guatemalensis Archila in *Revista Guatemal. Suppl. espec.* 15(1-21) Nov. 1999 is the name at specific rank for the plant formerly included as *Lyc. skinneri* var. *ipala* Oakeley ined. and *Lyc. ipala* Oakeley ined., and will now be used in place of *Lyc. ipala* for grex registration. See also below.

***Lycaste Hybrid* and *Lyc. smeeana* Rchb.f.**

The hybrid *Lycaste deppei* x *Lyc. skinneri* was recorded, but not named, as the first artificial cross in *Lycaste* in the *Gardeners' Chronicle* 10: 535 (1878). It remained nameless until Veitch used the name *Lyc. Hybrid* in his *Manual of Orchidaceous Plants* 97 (1893). *Lyc. smeeana* Rchb.f. appeared in *Gardeners' Chronicle* 20: 198 (1883) as a natural hybrid of the same parentage from Guatemala. Therefore the name *Lyc. smeeana* has date priority and the name *Lyc. Hybrid* will be replaced in the data base by *Lyc. smeeana*.

Recently, Oakeley (pers. comm.) has expressed the opinion that this natural hybrid and the co-extensive grex in cultivation, are not the same as the plant described as *Lyc. guatemalensis* Archila or its horticultural synonym *Lyc. skinneri* var. *ipala*, which always displays a uniformly pink/purple lip. This opinion differs from the conclusion reached by Dix, M.A. & Dix, M.W.

(2000) *Orchids of Guatemala, a revised annotated checklist*. p. 30, where *Lyc. smeeana* and *Lyc. skinneri* var. *ipala* are equated. According to Oakeley, the name *Lyc. smeeana* relates to plants originating from the humid zones north of Sierra de las Minas, Guatemala at 1,000m, where both parents co-occur. The plant is similar to *Lyc. deppei* except for coloration: pale green sepals with dense pink suffusion and spotting; petals white spotted rose and the lip shaped like *Lyc. deppei* but slightly wider, white spotted with rose. This matches illustrations in *American Orchid Society Bulletin* 52: 912, t.11 (1983) and Tinschert, O. & Behar, M. (1998) *Guatemala and its orchids*. Bancafé, Guatemala p. 155.

***Parasarcophilus Dockrill* reduced to synonymy under *Sarcophilus* R. Br.**

The nomenclature in the registration data base has been changed to follow the reduction of *Parasarcophilus* to synonymy under *Sarcophilus* by M.A. Clements in Catalogue of Australian Orchidaceae, *Australian Orchid Research* 1:131-134 (1989). This has resulted in the transfer of all 23 grexes registered under the nothogenus *Parachilus* M. Wreford & I.A. Butler in *Orch. Rev.* 80(945): 63 (March 1972) to *Sarcophilus*. Happily, there are no grex homonyms as a result.

This change also necessitates the reduction of the nothogenus *Sarpariza* B.Gerhard & P.F.Hunt in *Orch. Rev.* 107(1226): 125, 126 (Mar. 1999) to synonymy under *Plectochilus* J.E.Rumril & J.Greatwood in *Orch. Rev.* 84(1000): centre page pullout p.13 (Oct. 1976).

Furthermore the transfer of *Sarcophilus moorei* (Rchb.f.) Schltr. to the genus *Rhinerrhiza* Rupp to become *Rhin. moorei* (Rchb.f.) Clements, Wallace & Jones in *Australian Orchid Research* 1: 128-129 (1989), also requires that the grex *Sarco. Aussie Moor Man* be transferred to *Rhinophilus* J. Greatwood in *Orch. Rev.* 80(949): 140 (July 1972). See also Lewis, B.A. & Cribb, P. (1991) *Orchids of the Solomon Islands and Bougainville* 266-268, fig. 69.

***Pleione speciosa* Ames & Schltr. replaced by *Pln. pleionoides* (Kraenzl.) Braem & Mohr**

In order to bring nomenclature in the data base in to line with Cribb & Butterfield, *The genus Pleione* (1999), the following parents of registered grexes have been changed.

Seed parent changed from *Pln. speciosa* to *Pln. pleionoides*

Asama (1983)

Myojin (1987)

Erh Hai (1990)

Rakata (1982)

Etna (1979)

Special Prayer (1994)

Fu Manchu (1984)

Stromboli (1979)

Hekla (1982)

Tacana (1987)

Pollen parent changed from *Pln. speciosa* to *Pln. pleionoides*

Bandai-San (1991)

Tolima (1079)

Brigadoon (1982)

Tongariro (1981)

Tibesti (1992)

Yu Shan (1983)

***Pleione aurita* Cribb & Pfennig separated from *Pleione chunii* Tso.**

As a consequence of research published by Cribb & Butterfield, Little known and confused species of *Pleione*, in *The New Plantsman* 8(3): 138-146 (2001), the following changes in registered grex parents have been effected in the data base.

Seed parent changed from *Pln. chunii* to *Pln. aurita*.

Edgecombe (1996)

Ruby Wedding (2000)

Europa (1997)

Sven Glueckspilz (1992)

Topolino (1992)

***Pleione* natural hybrids and co-extensive grexes**

Following application of ICNCP Art. 16.2 regarding co-extensive taxa, the *Pleione* grexes listed below become synonyms of described natural hybrids.

Pln. x christianii (= *Pln. yunnanensis* x *forrestii*) syn. *Pln. Krakatoa*

Pln. x kohlsii (= *Pln. aurita* x *forrestii*) syn. *Pln. Edgecombe*

Pln. x taliensis (= *Pln. bulbocodioides* x *yunnanensis*) syn. *Pln. Archie Goodwin*

Diacritical signs

ICBN Art. 60.6 has been implemented in the data base resulting in the removal of all diacritical signs from Latin names and generic abbreviations, but not grex and cultivar names. Thus genera formerly presented as *Aërides* are now present as *Aerides*. This will have the advantage of making the web version much easier to search.
