*New or new to registration, intergeneric hybrid genus with abbreviation (in square brackets after the genus name) for the following combinations. The botanical authority follows each component genus.

Aspomesa [Apm.] J.M.H.Shaw = *Aspasia* Lindl. x *Gomesa* R.Br.

Ronmaunderara [Ron.] R.Maunder = *Baptistonia* Barb.Rod. x *Brassia* R.Br. x *Odontoglossum* Kunth x *Oncidium* Sw.

¶ Species appearing for the first time as parents in registration: *Dendrobium cunninghamii* Lindl.; *Masdevallia rex* Luer & Hirtz; *Phragmipedium tetzlafricanum* O.Gruss; *Prosthechea garciana* (Garay & Dunst.) H.E.Higgins; *Restrepia cuprea* Luer & Escobar; *Rstp. dodsonii* Luer; *Trichocentrum pumilum* (Lindl.) M.W.Chase & N.H.Williams.

CORRECTIONS

Aerides

In the past, the register has treated *Aerides* Lour. as though it were a feminine name, whereas it should have been regarded as neuter. This requires that the suffix of many species epithets be changed from -a to -um, as in the following examples: *crassifolia* to *crassifolium*, *falcata* to *falcatum*, *japonica* to *japonicum*, etc.

At the same time opportunity was taken to recognise *Aerides houlettianum* which replaces *Aerides falcata* var. *houlettiana*. This results in a change of registered parent for *Aeridovanda* Permitt (1974) and *Photisan* (1971).

Brassolaeliocattleya Baladin (1958) and *Blc.* Touraine (1987) have been found to have the same parentage, consequently, *Blc.* Touraine becomes a synonym of *Blc.* Baladin. Thanks to Olof Frisk for bringing this to the registrar's attention.

Cynodes Jumbo Puff and *Cynodes Taiwan Gold*. Following a redetermination of plants called *Cyc. chlorochilon* 'Jumbo' as *Cyc. warscewiczii*, Andy Chen of Jumbo Orchids, Taiwan has asked that all Jumbo Orchids registrations listing *Cyc. chlorochilon* 'Jumbo' as a grex parent be changed to read *Cyc. warscewiczii* 'Jumbo' as the parent. This means that plants obtained from Jumbo Orchids and since registered as *Cynodes* Taiwan Gold (Orchis Flor., 2004) and published in *Orch. Rev. Suppl.* 112(1258): 52 (July 2004) are the same as plants previously registered by Jumbo Orchids as *Cynodes* Jumbo Puff (Jumbo Orch., 2001).

Registered hybrids affected by this change are: *Cycd.* Jumbo Bay; *Cycd.* Jumbo Ecstatic; *Cycd.* Jumbo Erebus; *Cycd.* Jumbo Puff (syn. *Cycd.* Taiwan Gold); *Cycd.* Jumbo Vision; *Cloughara* Jumbo Pandora; *Clowenoches* Jumbo Valor.

Dendrobium Australian Star was published with the wrong pollen parent in *Orch. Rev. Suppl.* 112(1260): 85 (Nov. 2004), for Mario please read Miara.

Dendrobium Vellayani Sakura Fairy appeared in *Quart. Suppl. Int. Reg. Orch. Hyb.* 8 (March 2005), as *Den.* Indira Ghandi, please change the name at the request of the registrant.

Doritaenopsis Taida Golden Manager appeared in *Orch. Rev. Suppl.* 111(1249): 6 (Jan. 2003), as Taida Golden Manger, please correct the spelling.

Herbertara Daphne Hinds appeared under *Schombocattleya* by error in *Quart. Suppl. Int. Reg. Orch. Hyb.* 19 (March 2005).

Laeliocattleya Anita and *Lc. Arabis* were both named by Mansell and Hatcher in 1921 with the same parentage, *Lc.* Saint Gothard x *C.* Armstrongiae. *Lc.* Anita has been accepted, in preference to *Lc.* Arabis.

Laeliocattleya Conceição Alvin De Souza was published with the wrong spelling in *Orch. Rev. Suppl.* 112(1258): 55 (July 2004).

Lealiocattleya Mirabelle and **Lc. Miranda** were both recorded in 1940 with the same parentage of *Lc. Adonis* x *Lc. Sargon*. Since the epithet *Miranda* is also in use for grex names in *C.*, *Bc.*, *Blc.* and *Slc.* it is now treated as a synonym of *Lc. Mirabelle*.

Paph. Boltonii is a synonym of **Paph. Muriel Hollington**.

Josep M. Puig Vverdura has kindly drawn the registrar's attention to a study by Kohji Karasawa (1981), A review of chromosome numbers in some hybrids of *Paphiopedilum*, *Bull. Hiroshima Bot. Gard.* 4: 1-8, which concluded that the parentage of *Paph. Boltonii*, listed in the register as of unknown parentage, was *Paph. insigne* x *Paph. niveum*. By coincidence, other records of this grex came to light in *Gard. Chron.* 46: 364, 407 (1909); *Gard. Mag.* 1909: 947; *Journ. of Hort.* 59: 529, f. (1909); and *Kew Bull.* 1909(App. 3): 65, which noted, 'A garden hybrid probably between *Paph. insigne* 'Sanderæ' and *Paph. niveum*. The flowers are wax-like and of the purest white, with a few minute dark spots on the lower part of the dorsal sepal.' As a result, *Paph. Boltonii* (1909) is now treated as a synonym of *Paph. Muriel Hollington* (1891). However, parentage of the greges registered with *Paph. Boltonii* as a parent have not been changed.

Paphiopedilum Goliath has for some time been recorded as of unknown parentage in the Register. However, as Josep M. Puig Vverdura recently pointed out to the registrar, the Hermans index of RHS Orchid Awards 1841-2002 CD-ROM states that *Paph. Goliath* received an AM/RHS on 2 Dec 1913 with the recorded parentage, *Paph. insigne* 'Harefield Hall' x *Paph. Amy Moore*, see *OR.22*: 24. Further research has revealed that the epithet *Amy Moore* appears in the literature both as a grex and also as a cultivar of *Paph. Troilus*. Therefore the register entry for *Paph. Goliath* has been changed to show the parentage *Paph. insigne* 'Harefield Hall' x *Paph. Troilus* 'Amy Moore', in agreement with *OR. 28*: 22 (1920). Furthermore, the register contains the note, 'Very distinct from *Paph. Dreadnought* which has the same parentage'. Because of this comment, the parentage of the greges listed with *Paph. Goliath* as a parent has not been changed.

Paphiopedilum Ruby Slippers was registered with the incorrect parentage by error. Please change the pollen parent to read *Paph. Virgo* instead of *Sandra Lee* gx, see *Orch. Rev. Suppl.* 110(1246): 59 (July 2002).

Phalaenopsis Walnut Valley Princess (as *Chiayi Spot* x *Ching Her Princess*) and **Phal. Walnut Valley Red** (as *Walnut Valley Princess* x *Sogo John*).

Several years ago a plant labelled as *Phal. Chiayi Spot* x *Ching Her Princess* was mericloned and widely distributed. Several orchid nurseries in the USA carried the plant, including the Orchid Konnection in Dallas, Texas. Sometime later Mr Moses contacted many of his customers and informed them that this plant, originating from *Ching Her Nursery* in Taiwan, had been released with the wrong parentage on the tags. The correct parentage is thought to be *Phal. Golden Sun* x *Ching Her Princess*. Subsequently, this cross was registered by *Ching Her* as *Phal. Ching Her's Light*. The cross of *Phal. Ching Her's Light* x *Sogo John* was registered as *Phal. Green Sun*. Sometime later, one of the mislabelled *Phal. Chiayi Spot* x *Ching Her Princess*, which was actually *Golden Sun* x *Ching Her's Light*, was registered in good faith as *Phalaenopsis Walnut Valley Princess*. Therefore *Phal. Walnut Valley Princess* is a synonym of *Phal. Ching Her's Light*. Similarly, *Phal. Valley Red* is a synonym of *Phal. Green Sun*.

A further cross, registered as *Phal. Walnut Valley Magenta* (*Walnut Valley Red* x *Brother Purple*) needs to have the parentage changed to *Phal. Green Sun* x *Brother Purple*.

Thanks to Albert Dean Stock of Canyon Orchids for bringing this to the registrar's attention.

Potinara Redland Firefly appeared under *Blc.* by error in *Quart. Suppl. Int. Reg. Orch. Hyb.* 4 (March 2005).

Vanda Grove's Dream and **V. Peregrino Lorenzo**.

The registration of the two grex names above to facilitate handling the separate colour races derived from the Red and Blue/purple flowered Groups of *Vanda coerulea* has caused consternation in some circles. Subsequently the AOS has requested that this not be permitted. While it is, of course, entirely permissible under the *International Code of Nomenclature for Cultivated Plants*, the registrar has agreed to accede to this request, with the result that *V. Peregrino Lorenzo* is now treated as a synonym of *V. Grove's Dream*. However, this epithet *Peregrino Lorenzo* will now be established as a Group within *V. Grove's Dream* grex, distinguished by red/pink flowers. *Vanda Grove's Dream* also contains a second Group distinguished by blue/purple flowers and known as Blue-flowered Group.

Vandachostylis Cranberry Glory appeared under *Rhynchovanda* by error in *Quart. Suppl. Int. Reg. Orch. Hyb.* 19 (March 2005).

Wilsonara Nancy Diamond appeared under *Odontioda* by error in *Quart. Suppl. Int. Reg. Orch. Hyb.* 12 (March 2005).

SANDER'S LIST OF ORCHID HYBRIDS Addendum 2002-2004

Scheduled for publication 18th May 2005. Should be widely available by the time this Supplement is published.

REGISTRAR'S NOTES

The correct name for the hybrid *Bifrenaria* x *Lycaste*.

For many years the Register has employed the generic name *Lycasteria* for this cross, however a reconsideration of the literature shows that it is predated by two other hybrid generic designations.

Lycastenaria [Ly.] Colman, *Hybridization of Orchids* 80 (1933).

Synonyms: *Lycasteria* [Lystr.] W.Cook & D.Sander in *Orch. Rev.* 62(732): 92 (June 1954).

Lyfrenaria [Lyf.] McBean & L.Roper in *Gard. Chron.* ser. 3, 135: 175 (1954).

In *Orch. Rev.* 62(735): 140 (Sept. 1954) it is acknowledged that the choice of *Lycasteria* for this hybrid is against the principal of priority. The ICBN Art. 11.8 and ICNCP Div. III, 12 both indicate that for the purposes of priority, names of hybrid genera are subject to the same rules as are those of non-hybrid genera.

Hagsatera brachycolumna Tamayo

Recently the release of young plants of two hybrids involving this taxon has lead to the request for appropriate nothogenera, which are here provided.

Hagsavola [Hgv.] nothogen.nov. = *Brassavola* R.Br. x *Hagsatera* Tamayo, based on the unregistered grex *B. nodosa* x *Hag. brachycolumna*.

Hagsechea [Hgc.] nothogen.nov. = *Hagsatera* Tamayo x *Prosthechea* Knowles & Westc., based on the unregistered grex *Hag. brachycolumna* x *Psh. cochleata*.

Pescatorea vs. *Pescatoria*

The name of this well known genus has long been spelled as *Pescatorea* Rchb.f. in the Register, however this name dates from 1869 and is predated by *Pescatoria* Rchb.f., published in 1852. The Register will now use the earlier orthographic variant as that has priority.

Phragmipedium dalessandroi Dodson & O.Gruss was described in *Die Orchidee* (Hamburg) 47: 217 (1996). Olaf Gruss recalled being encouraged to do so by staff at the Eric Young Orchid Foundation, where it had been used extensively in hybridisation. Since then it has acquired a further name and status as *Phrag. besseae* var. *dalessandroi* (Dodson & O.Gruss) A.Moon & P.J.Cribb in *Orchid Rev.* 105: 229 (1997). After considering requests and comments from several sources the registrar has agreed to accept this taxon for registration as a grex parent. On the one hand it is well known that individual plants exist in the wild which are intermediate in characters between *Phrag. besseae* and *Phrag. dalessandroi*, a factor which favours treatment below the rank of species. One botanist with field work

experience in Ecuador commented that that the situation appeared typical of a subspecies. Interestingly, several subspecies in *Paphiopedilum* are currently accepted as grex parents for the purpose of registration. On the other hand, current floristic literature for the region, such as Jorgensen & León-Yáñez, *Cat. Vasc. Pl. Ecuador* 1999: 436 accepts *Phrag. dalessandroi* as a species, as does much of the current orchid literature. In this regard the recent discussion of *Phragmipedium* hybrids in *Die Orchidee* 55(2): 224 (2004) is of particular interest. The registrar is also anxious to avoid the situation that has developed in *Phalaenopsis* from the unfortunate consequences of lumping taxa under *Phal. lueddemanniana* for example. With these points in mind, *Phrag. dalessandroi* is accepted before the record of its use in breeding becomes lost.

Replacement of the name *Laelia rupestris* by *Laelia crispata*

Laelia rupestris Lindl. in *Bot. Reg.* 28, sub t.62 (1842) is a synonym of *L. crispata* (Thunb.) Garay in *Bradea* 1: 302 (1973), which has priority because of its earlier basionym, *Cym. crispatum* Thunb., *Plant. Bras.* 2: 18 (1818). Making this change in the register has resulted in *Lc. Pink Crystal* (2000) becoming a synonym of *Lc. Star Pink* (1980).

An unlikely hybrid appears in a recently published Flora of the Basque region of NE. Spain. Pages 721, 724 & 726, refer to *Spilorhiza* [Spil.] Hermsilla, Fernandez & Undagoitia = *Dactylorhiza* Necker ex Nevski x *Spiranthes* L.C.M.Richard, based on the putative natural hybrid *Spilorhiza diversiflora* Hermsilla, Fernandez & Undagoitia nom. nud. (*Dact. elata* (Poir.) Soó x *Spir. aestivalis* (Poir.) L.C.M.Rich.), in *Estud. Mus. Ci. Nat. Alava* 13: 152 (1998). Would anyone like to try and synthesise this cross? Ref. Aizpuru, I., Aseginolaza, C., Uribe-Echebarria, P.M., Urrutia, P. & Zorrakin, I. (2003) *Claves ilustradas de las Flora del Pais Vasco y territorios limitrofes*. Eusko Jaurlaritzaren Argitalpen Zerbitzu Nagusia/ Servicio Central de Publicaciones del Gobierno Vasco, Vitoria-Gasteiz.

Establishment of Groups

Since the early days of orchid hybridisation the problem of how to name several hybrids that are between the same species but involve different infra specific parents, that are considered significant, has been a source of difficulty. See for example the note above under *Vanda* Grove's Dream and *V. Peregrino Lorenzo* for a recent example. One possibility, here used as a working hypothesis, is the establishment of Groups based on description, within a grex based on parentage, an idea which has met with acceptance from ICNCP commissioners. Descriptions vary in detail style and quality as they are provided by the originators.

Paph. Calloso-barbatum gx **Norman Atkinson Group** derived from *Paph. barbatum* var. *nigratum* 'Dyak Warrior' x *Paph. callosum* var. *viniferum* 'Jac'. Raised by Agnes Atkinson, made 12 Dec 1998, f. fl. 16 Nov 2004. Description: 'Dorsal sepal green, red and white. Petals red and green; pouch red; staminode light red.'

Paph. Nori's Bell gx **Aoinokimi Gp** derived from *Paph. bellatulum* x *Paph. Norito* Hasegawa. Raised by Toshinori Tanaka, made 10 Apr 1998, f. fl. 20 Dec 2004. Description: 'Natural spread of flower 11 cm, petal width 4.6 cm. Petals and sepals slightly pointed at top. Dorsal sepal, ventral sepal, petals and pouch are yellowish creamy green. The dorsal sepal is slightly darker in colour. Purple brown spots irregularly cover the petals and sepals, more densely towards the centre and more scattered towards the periphery. Spots are absent from the pouch interior, the interior is heavily spotted with tiny purple brown dots. The staminode is white with dark purple red on the lower half.' The original Nori's Bell grex was derived from *Paph. bellatulum* 'Album' x *Paph. Norito* Hasegawa.

Paph. Uri Baruk gx **Akitsuhime Gp** derived from *Paph. Norito* Hasegawa x *Paph. godefroyae* 'Ang-Thong'. Raised by Toshinori Tanaka, made 15 Apr 1999, f. fl. 21 Nov 2004. Description: 'Flower, natural spread 9.5 cm, petal width 5 cm. Dorsal sepal is pointed a little bit at the top, pale creamy green, a little darker than other tepals. Ventral sepal, petals and pouch pale creamy green, petals rounded at the top. Sepals with very tiny purple-brown spots all over, becoming more dense towards the centre. Pouch without spots on exterior, with tiny purple brown spots increasing heavily towards the base and inside. Staminode white with lower half dark purple red.'
