FEATURES

The best yellow magnolias
The authors discuss the best ten cultivars and the breeding that created them
Koen Camelbeke & Maurice Foster 78–85

A new Digitalis hybrid
The product of a cross between Digitalis and what was Isoplexis
James Armitage 86–89

Iris foetidissima and its cultivars
A surprising range of cultivars have been selected from this useful plant
Graham Rice 90–97

Hyacinth breeding since the 19th century
From its decline in the 20th century, breeding is enjoying a revival
Arie Dwarswaard 98–101

An arboreal Skimmia
A Skimmia of tree-like proportions that the author introduced from the Himalayas nearly 40 years ago
Tony Schilling 102–103

An overview of Libertia
A distinctive genus, with green-leaved and dramatically coloured-leaved species, but identification is a problem. New research has helped sort out the confusion
Julian Shaw 104–113

Hydrangea involucrata and its cultivars
A resurgence of new cultivars is helping to restore the reputation of this Japanese hydrangea. New and old are compared
Maurice Foster 114–120

Metapanax and Dendropanax in cultivation
Unusual evergreen shrubs for the adventurous gardener – two close relatives in the Araliaceae are discussed
Eric Hsu 121–125

James Russell
Biography of a nurseryman and garden designer whose lasting legacy is the landscape design and planting of the arboretum at Castle Howard
John Grimshaw 126–131

Front Cover Photograph
Iris foetidissima ‘Variegata’
Although it does not flower as readily as other stinking iris cultivars (pp90–97), this variegated selection has striking foliage. The picture shows a clone with deeper blue flowers than most plants grown under this name.

Notes for Contributors

The Editor welcomes suggestions for articles, but please contact him first with a synopsis of your idea. Features will preferably be accompanied by high quality transparencies, colour prints or digital photographs. The latter must be high resolution – at least 300dpi.
