FEATURES

Mexican oaks in cultivation
Of the 90 Mexican Quercus species introduced to the UK, the best are discussed and recommended.

Harry Baldwin 10–17

Fagus hayatae, new to horticulture
A beech native to Taiwan is showing promise in UK botanic gardens.

Andrew Luke 18–19

An overview of Leucojum
Amid rising enthusiasm for the genus, many unusual snowflake cultivars are being introduced.

Wim Boens 20–25

Oriental poppies of gardens
The classification of cultivars once attributed to Papaver orientale.

Christopher Grey-Wilson 26–27

A survey of Digitalis hybrids
Foxglove hybridizing is enjoying a renaissance but it has a legacy stretching back to the mid 19th century. All known hybrids between species are chronicled here.

Graham Rice 28–36

New Camellia species from Vietnam
The horticultural and hybridization potential of a range of new subtropical species.

George Orel & Tony Curry 37–43

Reinstating Victorian Gladiolus
How a once widespread 19th-century cultivar made its way back to Heligan.

Philip McMillan Browse 44–47

Honey fungus: new insights into a tree killer
Recent research into Armillaria will aid control of this deadly fungus, the most frequent subject of pathogen enquiries to the RHS Advisory Service.

Kathryn Ford, Andy Bailey & Gary Foster 48–54

Sir Peter Smithers
Biography of an international plantsman who was the inspiration behind James Bond

Charles Quest-Ritson 60–65

FRONT COVER PHOTOGRAPH

Leucojum aestivum
Although the genus consists of just two species, Leucojum aestivum and L. vernum, there is an increasing range of cultivars available (pp20–25). Leucojum aestivum is the later flowering of the two species.
