\*New intergeneric hybrid genus with abbreviation for the following combination. The botanical authority follows each component genus.

**Holmara** (Hlm.) = *Baptistonia* Barbosa Rodriguez x *Leochilus* Knowles & Westcott x *Oncidium* Swartz x *Rodriguezia* Ruíz & Pavon. Breeding group 8. Named for Herr Claus Holm of Hamburg, Germany, a keen amateur breeder for more than 30 years.

**Macraithara** (McC.) = *Baptistonia* Barbosa-Rodrigues x *Cochlioda* Lindley x *Odontoglossum* Kunth. Breeding group 8. Named for Gerald McCraith of Australia, an established breeder of *Odontoglossum*, who in his 94<sup>th</sup> year still travels on field trips, collecting in South America and New Guinea. Gerald was instrumental in establishing the Australian Orchid Foundation and in 1993 was appointed a Member of the Order of Australia. See *Orchid Review* 101: 178 (1993). [Note: The ICBN 60C.4(a) recommends that the Scottish patronymic prefix "Mc" should be spelled "mac" and united with the rest of the name].

**Pescenia** (Pesc.) = *Pescatoria* Rchb. f. x *Stenia* Lindley. Breeding group 6. [Note: *Pescatoria* Rchb.f. (1852) is also spelled *Pescatorea* Rchb.f. (1869), as in *RHS Dictionary*, *RHS Manual of Orchids* and many other reference works, however notwithstanding that the name commemorates V.Pescatore, advice from nomenclatural experts at Kew is that *Pescatoria* is the correct form. The genus was reviewed in *Orchid Digest* 32: 86-91 (1968).]

**Polyphylax** (Ppx.) = *Dendrophylax* Rchb. f. x *Polyradicion* Garay. Breeding group not certain, possibly 9, along with *Aeranthes* and *Angraecum* [cf. Dressler (1993) places these genera together in the *Angraecinae*]. This cross combines two small genera endemic to the Caribbean and both new to registration, consisting of very reduced plants with only roots and inflorescences. Recognition of this hybrid genus does not imply rejection of the recent reduction of *Polyradicion* to synonymy under *Dendrophylax* by Mark Nir in *Orchidaceae Antillanae* (2000) as all generic limits will be reviewed in conjunction with the *Genera Orchidacearum* project.

⌘ Natural genera new to registration. *Dendrophylax* Rchb. f.; *Gymnadenia* R. Br.; *Polyradicion* Garay.

¶ Species appearing for the first time as parents in registration: *Aërangis carnea* J. L. Stewart; *Brassia wagneri* Rchb. f.; *Bulbophyllum dentiferum* Ridley; *Bulb. dolichoblepharon* J.J. Smith [as *Cirrhopetalum dolichoblepharon* (J.J. Smith) Schlechter]; *Bulb. gracillimum* (Rolfe) Rolfe; *Bulb. sulawesii* Garay, Hamer & Siegerist; *Coelogyne cumingii* Lindley; *Dendrophylax funalis* (Swartz) Bentham ex Rolfe; *Epidendrum fastigiatum* Lindley; *Gymnadenia conopsea* (L.) R. Br.; *Mormodes wolterianum* Kraenzlin; *Oncidium angustisepalum* Kranzlin; *Onc. cariniferum* (Rchb. f.) Beer, [formerly recognised as *Odontoglossum*]; *Polyradicion lindenii* (Lindley) Garay.

§ First registration as a grex of a known natural hybrid. x *Dactyloдения legrandiana* (Camus) Soó = *Dactylorhiza maculata* (L.) Soó x *Gymnadenia conopsea* (L.) R. Br. This nothogenus is in the *Handbook on Orchid Nomenclature and Registration* as x *Dactylogymnadenia* Soó, however, this is rejected in favour of x *Dactyloдения* Garay & Sweet in recent taxonomic treatments. It is recorded from the wild in Britain and Europe.

#### CORRECTIONS

##### **Lycaste Bob Weltz and L. Mathiasiae**

In *Sander's List of Orchid Hybrids* (SLOH) Addendum 1996-1998 p. 315 & 317, please note that the grex name *L. Bob Weltz* should be replaced by *L. Mathiasiae*. See also *Orchid Review* 105: 185 (May-June, 1997).

##### **Paphiopedilum Cicada's Shrii**

Unaccountably this entry appeared under *Phalaenopsis* in the *New Orchid Hybrids List* March - April 2001 p. 11. The entry is included in the current list under *Paphiopedilum*.

##### **Pleione Wharfedale**

Reference to the original application form reveals that this name was incorrectly entered in the data base and is consequently misspelled as Wharfdale in SLOH Addendum 1991-1995 p. 978- 980. However, the correct orthography is found in the *Orchid Review* 101: 189 (1993)

#### **Wilsonara Gerald Michael Lawless**

This entry appeared by error under *Odontocidium* in the *New Orchid Hybrids List* July- August 2001 p. 9. The entry is included in the current list under *Wilsonara*.

### REGISTRAR'S NOTES

#### ***Brassolaeliocattleya* Marjorie Frey**

*Blc.* Marjorie Frey was registered as *Lc.* Rembrandt x *Blc.* Wake Island in 1957, which is the sole instance of *Lc.* Rembrandt being registered as a grex parent. The cross was produced by the late Milton Warne of Hawaii whose plants did not flower in time to effect registration by the originator. Five years before his death he revealed to Morley Cox of Utah (who has pursued the breeding of this group of plants and who brought this request to the attention of the registrar) that the registration of this grex was in error and that the seed parent was in fact *C.* Rembrandt.

[Note: *C.* Rembrandt (1901) = *C.* *elongata* x *C.* *labiata*.

*Lc.* Rembrandt (1932) = *Lc.* Clarice x *Lc.* James Goodier]

Plants of *Blc.* Marjorie Frey are characterised by large inflorescences of up to eleven flowers

c.14 cm across with spade lips, pseudo bulbs up to 60 cm and bifoliate leaves with a spread of up to 90 cm. Such characters are inconsistent with *Lc.* Rembrandt but match the performance of *C.* Rembrandt, particularly the clone 'Tenys' which can produce 20 flowers per inflorescence. These desirable characteristics are derived from *C.* *elongata*. Other floral characters including form, consistency and colour are very similar to *C.* Rembrandt and its derived hybrids including *Lc.* Rosa Kirsch [= *Lc.* Pasadena x *C.* Rembrandt (1950)] and *Blc.* Coed [= *C.* Rembrandt x *Blc.* Norman's Bay (1961)].

Additional supporting evidence may be provided by cytology. *Cattleya* Rembrandt is a triploid ( $3n=60$ )<sup>1</sup>, being derived from *C.* *labiata* ( $2n=40$ )<sup>1</sup> and *C.* *elongata* ( $4n=80$ )<sup>1</sup>, which may explain the difficulties encountered in breeding from it. Despite which *C.* Rembrandt is a parent to 37 registered grexes. [Name change accepted at ORAC meeting 24<sup>th</sup> May 2001.]

#### ***Lycaste* Bob Weltz and *L.* *mathiasiae* Kennedy**

The grex name *L.* Bob Weltz was registered on 4<sup>th</sup> April 1997 as the cross *L.* *macrophylla* x *L.* *locusta*. Since then research by Dr. H. Oakeley has led him to conclude that the plant described as *L.* *mathiasiae* Kennedy [pro sp.] in *Orchid Digest* 42(2): 59-61 (1978), also represents the same hybrid. Consequently the grex name *L.* Bob Weltz becomes a synonym of *L.* *Mathiasiae*, which has nomenclatural priority by earlier date of publication. The hybrid in question has also been distributed under the misapplied grex name *L.* Olivia, which name properly applies to plants resulting from the cross *L.* *locusta* x *L.* *xytriophora*. An illustration of *L.* *mathiasiae* appears in Oakeley, H. (1993) *Lycaste* species - The essential guide p. 26 [where the name appears as an orthographic error, mathiasae.] It is also illustrated and described as *L.* *locusta* x *L.* *ciliata* in Fowlie, J.A. (1970) *The genus Lycaste*, p. 72, 78, and in *Orchid Digest* March-April 1978 p. 60-61.
