-----	---	------------------------

¹ *Paph. Chai-Ui Lady*. According to *Rev. Hort. Belg.* 1905: 167 and *Kew Bull.* 1906(App. 3): 66, where the seed parent is listed as *Paph. bellum* with the annotation ? *bellatulum*, this cross was first made by Lambeau 1905, but apparently not named until recently re-made by R. C. Wu in 1999, and registered here by W. M. Lee in 2005.

*New or new to registration, intergeneric hybrid genus with abbreviation (in square brackets after the genus name) for the following combinations. The botanical authority follows each component genus.

Chrisanthera [*Chrt.*] = *Christensonia* Haager x *Renanthera* Lour. Br-gp 9.

Davidsonara [*Dvd.*] = *Brassavola* R.Br. x *Cattleya* Lindl. x *Laelia* Lindl. x *Prosthechea* Knowles & Westc. Br-gp 7.

Maccorquodaleara [*Mcq.*] Ross Tucker = *Aganisia* Lindl. x *Batemannia* Lindl. x *Cochleanthes* Raf. x *Otostylis* Schltr. x *Pabstia* Garay x *Promenaea* Lindl. x *Zygopetalum* Hook. x *Zygosepalum* Rchb.f. Br-gp 6. Based on the surname McCorquodale, which has to be modified to Maccorquodale according to *ICBN Art.* 60C.4.

Marvingerberara [*Mrv.*] M.& R.Gerber = *Brassavola* R.Br. x *Caularthron* Raf. x *Laelia* Lindl. Replaces *Gerberara* which is contrary to the *ICBN Art.* H.8 as it contains *Diacrium* Benth. as a component.

Takakiara [*Tak.*] Takaki = *Lycaste* Lindl. x *Pabstia* Garay x *Zygopetalum* Hook. Br-gp 6. The orthography of this name, which is based on the personal name of Seisaku Takaki, proprietor of Takaki Orchid Nursery, follows the transcription used in *AOS Bull.* 56(2): 130 (Feb. 1987). This personal name has also been transcribed elsewhere (including SLOH) as Takagi, but advice from Japan recommends use of the form Takaki.

Yinwaiara [*Yin.*] W.R.How = *Aerides* Lour. x *Christensonia* Haager x *Rhynchostylis* Bl. x *Vanda* Jones ex R.Br. Br-gp 9.

¶ Species appearing for the first time as parents in registration: ***Bulbophyllum wendlandianum*** (Kraenzl.) Dammer*; ***Cleisostoma crochetii*** (Guillaumin) Garay; ***Maxillaria fletcheriana*** Rolfe; ***Max. pulla*** Linden & Rchb.f.; ***Pleione albiflora*** P.J.Cribb & C.Z.Tang.

* According to Garay, Hamer & Siegerist, *Nord. J. Bot.* 14(6): 626 (1994), Udo Dammer provided this combination in *Orchis* 1: 87 (1907). Many other authorities, including *IPNI* and *World Monocots Checklist* (Kew), cite J.J.Smith in *Bull. Jard. Bot. Buitenzorg*, II, 8: 29 (1912), as the author of this combination.

CORRECTIONS

Paphiopedilum Alma Gevaert. This well-known hybrid was produced and named by Pauwels in 1911 as *Paph. lawrencianum* x *Maudiae*. The cross was named after Alma Gevaert, the wife of Dr. Ballion, an orchid enthusiast in Ghent in those days. (Pauwels also had his greenhouses in Ghent.) Sadly, the young bride died during their honeymoon. Gevaert is still a common name in Flanders, whereas Gavaert simply does not exist as a family name.

The name *Paph. Alma Gevaert* is spelled correctly in the first edition of Sander's list on p. 69, where it occurs three times. On subsequent pages (e.g. 102) and in later Addenda the spelling error, Gavaert, which is by now widespread, crept in. The Register has now been corrected to reflect the original intention of Pauwels. Many thanks to Hans Janssens and Iris Cohen who have both pointed this out.

This also requires a change to the spelling of ***Paph. Hsinying Gevaert*** which appeared in *SLOH Addendum 1999-2001*: 454 as Hsinying Gavaert.

Paphiopedilum Bob Geiger appeared accidentally in *SLOH Addendum 2002-2004* p. 486 as *Paph. Bob Seiger*.

Phalaenopsis Celestial Event (*Phal. Ever-spring King* x *Phal. George Vasquez*) appeared in *Quart. Suppl. Int. Reg. Orch. Hyb.* 14 (July 2005), and *Phalaenopsis Journal* 14(4): 46 as *Phal. Super Nova*, but this has been changed to avoid confusion because *Phal. Supernova* (1987) is in use for *Phal. Alice Millard* x *Phal. Sandstorm*.

Phragmipedium Grosnez appears with the wrong parentage in *SLOH Addendum 2002-2004* p. 747. Please change *Phrag. lindleyanum* to read *Phrag. sargentianum*.

Sobralia Colmaniae. This grex epithet appears with several spellings in different works, and has been entered in the Register as *Colmanae*, following *SLOH* 1946: 245. The Register has now been corrected to follow Colman's original orthography as *Colmaniae*. See Colman, *Hyb. Orch.* 1933: 101; also: *Gard. Chron.* 46: 99 (1909); *Orch. Rev.* 1909: 276; *Kew Bull.* 1910(App. 3): 82, as *Colmanii*; *Gard. Chron.* 31st July 1920.

Trichocentrum Vicky Spence appeared in *Quart. Suppl. Int. Reg. Orch. Hyb.* 16 (July 2005) as a *Trichocidium* by error.

REGISTRAR'S NOTES

Dendrobium glomeratum* and *Den. sulawesiense

Since the registration of *Den. Pink Glow* by Fuji Nurseries in December 2004, there have been several enquiries about the seed parent which was originally submitted as *Den. sulawesiense*. *Dendrobium sulawesiense* was described and illustrated by Erfkamp and Gruss in *Die Orchidee* 51(1): 56 (2000). However, according to Jeffrey J. Wood (Herbarium, R.B.G. Kew) in *Orch. Rev.* 111: 298 (2003) it is a synonym of *Den. glomeratum* Rolfe in *Kew Bull.* 155 (1894), which latter name clearly has priority. Consequently *Den. sulawesiense* is treated as a synonym of *Den. glomeratum* in Registration. If it is considered that plants grown under the name *Den. sulawesiense* differ significantly from those grown under the name *Den. glomeratum*, there are a number of options available. If there is only one clone in cultivation it might be named *Den. glomeratum* 'Sulawesiense'. If there are several, or many seedling available they might be named *Den. glomeratum* Sulawesiense Group, and individual selections given an additional cultivar epithet. These designations can then be recorded in the Register should they be used as grex parents. A further option is the establishment of a Group within a grex to indicate the use of 'Sulawesiense'-type plants in a breeding program.

Further new intergeneric crosses involving *Cymbidium* Br-gp 6.

Cymbipetalum [Cbp.] J.M.H.Shaw nothogen. nov. = *Cymbidium* Sw. x *Zygopetalum* Hook., based on the unregistered hybrid *Cym. dayanum* x *Z. mackayi*, raised by M.Kumashiro in 1972.

Maxidium [Mxd.] J.M.H.Shaw nothogen. nov. *Cymbidium* Sw. x *Maxillaria* Ruiz & Pav., based on the unregistered hybrid *Cym. sinense* x *Maxillaria picta*, raised by M.Kumashiro.

See Tanaka, R., Aoyama, M. & Takaki, S. (1987) Documented intergeneric hybrids involving *Cymbidium*. *AOS Bull.* 56(2): 130-134.

***Cymbidium* Meglee and *Cym. Miss Taipei Unveiled* - a clarification.**

For sometime plants distributed under the unregistered grex name *Cym. Meglee* have been available as two clones, 'Ms. Taipei' with anthocyanin-purple floral markings and another cultivar apparently known by two names, 'Sunset Glow' or 'Hsiwan', with rust-orange flowers. *Cym. Meglee* is regarded as a trade name in the register and at least one commercial source lists its parentage as *Cym. suavissimum* x *Cym. insigne*. With the intention of providing a registered name for this grex, in 2001 Musia Stagg registered the name *Cym. Miss Taipei Unveiled* with the parentage *Cym. Super Baby* x *Cym. sinense*. (*Cym. Super Baby* = *Cym. ensifolium* x *Cym. Babylon*.) Recently, Prof. D. M. Burkus kindly provided the following useful observations that favour acceptance of this latter parentage. He notes that in both cultivars of *Cym. Meglee*, the distribution of anthocyanins within the perianth segments, and the floral pigments themselves, are similar to those known in the various select clones of *Cym. ensifolium*. Also the phenology of *Cym. Meglee* closely matches that of *Cym. ensifolium*. In Taiwan, as well as when cultivated under glass, *Cym. ensifolium* flowers several times during the year, and usually the first bloom precedes the onset of the rainy season, while a second bloom occurs several weeks after the rainy season has ended, with often a third in the autumn; *Cym. Meglee* likewise follows this pattern, and indeed its blooms tend to be synchronous with plants of *Cym. ensifolium* being grown in the same greenhouse. *Cym. kanran* also occasionally flowers out of season in a like way; and similar behaviour is also, but much more rarely, encountered with *Cym. sinense*.

Natural hybrids from Spain.

The publication of *Flora Iberica* vol. 21 in June 2005, has provided a detailed account of orchids in the Iberian peninsula. Several natural hybrids listed require new hybrid genera to accommodate them.

Of particular interest is, what is probably, the first reported natural hybrid involving three genera. Since at least the time of the survey of hybrids in *Orchidaceae* by Adams and Anderson (*Evolution* 12: 512-518. 1958), which reported only mono- and bigeneric natural hybrids, it has been assumed and oft repeated, that natural hybrids never involve more than two genera. If the present claim stands up to investigation it will have made history. However, it is not the first non-primary natural hybrid, as there is already at least one record of a natural hybrid involving three species, namely the European *Orchis laxiflora* x *O. longicornu* x *O. palustris*.

Anagymnorhiza [Agz.] nothogen. nov. = *Anacamptis* Rich. x *Dactylorhiza* Neck. ex Nevskix *Gymnadenia* R.Br., Br-gp 12, based on *Dactylorhiza elata* x [*Anacamptis pyramidalis* x *Gymnadenia odoratissima*], see *Fl. Iberica* 21: 110 (2005).

Anabarlia [Anb.] nothogen. nov. = *Anacamptis* Rich. x *Barlia* Parl., based on *Anacamptis* [*Orchis*] *collina* x *Barlia robertiana*, see *Fl. Iberica* 21: 153 (2005).
