Stanhopea radiosa Lem., *Ill. Hort. 6 (Misc.):* 72 (1859).

REGISTRAR'S NOTES ON NAMES IN THE REGISTER

New nothogenera

Dr Umakant Deshmukh has kindly advised that the nothogenus x *Angularia* [Alr.] J.Portilla in *Orchid Rev. Suppl.*, 124 (1313): 18 (2016) for hybrids of *Anguloa* x *Maxillaria*, is a later homonym of *Angularia* S.R.Samoilovich (1961), a genus of fossil algal spores. A replacement name here is provided, x *Maxiluloa* [Mul.] U.B.Deshmukh & J.M.H.Shaw nothogen. nov. = *Anguloa* Ruiz & Pavón x *Maxillaria* Ruiz & Pavón.

Ref. Malyavkina, V.S. *et al.* (1961) Pollen and spores from Central Siberia and the European Platform. *Incertae Sedis*. In: *Pyltsa i spory zapadnoi Sibiri, yura-paleotsen.* (S.R.Samoilovich and N.D.Mtchedlishvili, editors) Trudy Vsesoyuznogo Neftyanogo Nauchno-Issledovatel'skogo Geologorazvedochnogo Instituta, Leningrad (VNIGRI). Vol. 177: 251–258.

Cleisanthera [Cehr.] Mingzhong Huang, nothogen. nov. = *Cleisostoma* Blume x *Renanthera* Lour.

Cymbisteria [Cbt.] Mingzhong Huang, nothogen. nov. = *Cymbidium* Swartz x *Peristeria* Hook.

New combination.

Phalaenopsis formosana (Christenson) J.M.H.Shaw comb. nov. Basionym: *Phalaenopsis aphrodite* subsp. *formosana* Christenson, *Phalaenopsis: a monograph*: 197 (2001).

A note on *Phalaenopsis violacea*

The registrar has been asked whether *Phalaenopsis violacea* hort. ex H.Witte, *Fl. des Jardins* 4: 129 (1861) is the same taxon as *Phalaenopsis violacea* Teijsm. & Binn., *Natuurk. Tijdschr. Ned.-Indië* 24: 320 (1862). This question does not appear to be addressed in Christenson's monograph (2001).

Both references are available online in Biodiversity Heritage Library. If one reads the two articles it appears that Teysmann originally collected the plant in 1859 and sent plants to Leiden where a plant flowered. H. Witte had it painted and wrote it up in *Fl. des Jardins* in 1861, thus validly publishing the name. A year later Teysmann (Teijsmann) and Binnendijk published a description in a catalogue of plants at their Botanic Garden in Bogor. Hence, both names apply to the same plants. Christenson (2001, p162) has found an earlier publication of the same name in *Ann. Hort. Bot., Leiden* 4: 129 (1860). On p164, Christenson does base his *Phalaenopsis violacea* f. *alba* (Teijsm. & Binn.) on *Phalaenopsis violacea* var. *alba* Teijsm. & Binn., *Natuurk. Tijdschr. Ned.-Indië* 24: 321 (1862), but cites the wrong page as p320.

A new Group in *Spathoglottis x parsonii*

Spathoglottis x parsonii Ames & Quisumb. in *Philipp. Orchid Rev.* 1: 4. 1948; Holttum, *Fl. Malaya* 1: 161 (1953) = *Spathoglottis plicata* x *Spa. vanoverberghii*.

Lee Nam Fook, Malaysia, has bred a white-flowered version here named **Chia Su Hiang Group** obtained from *Spathoglottis plicata* var. *alba* x *Spa. vanoverberghii* 'White'. Made 15 Sep 2019; seed produced 20 Oct 2019; first flowered 13 Nov 2020. Flowers white, size 4.8cm.

Sander's List of Orchid Hybrids Three Year Addendum 2017–2019

The latest three-year (14th) addendum to Sander's list of orchid hybrids, published by the Royal Horticultural Society, contains names, parentage, and names of registrant and originator for all orchid hybrids registered between 1 January 2017 and 31 December 2019 – about 11,000 hybrids. It also includes a master list of all accepted hybrid genera currently in use. The list includes their standard abbreviations and component genera. In the three years covered, 86 new orchid nothogenera were named, bringing the total to 2,588 hybrid genera in *Orchidaceae*.
