# Plant Health Summer Studentships 2023

APPLY NOW

Join an active programme of plant science research and communication at one of the world's great gardens.

*“This placement gave me an opportunity to learn lab and experimental design skills which have been immediately beneficial to my studies. The facilities are incredible, and I was able to practise a broad range of techniques. Everyone there was supportive and knowledgeable, and I can highly recommend the RHS for a summer internship.”*

Lottie Goodman  
University of Manchester

### **What does RHS plant health research involve?**

- Plant disease and pest diagnostics using morphological and molecular ID
- Integrated disease and pest management
- Epidemiology of new and important diseases and pests
- Science communication

### **What can we offer?**

- 6–10 week summer research project tailored to suit your interests
- Gain new skills and laboratory and fieldwork experience
- Work alongside experienced scientists as part of the RHS Plant Health Team

### **Who can apply?**

Undergraduate students in their second year of study.

### **How is it funded?**

We will work with you to apply for funding from a number of external sources. Funding is typically around £300 per week.

### **How do I apply?**

Please send your CV and a cover letter outlining your interest to [ianwaghorn@rhs.org.uk](mailto:ianwaghorn@rhs.org.uk)

### **Deadline: 31 January 2023**

Placement opportunities will be subject to funding availability.
