

## Sorting it out

### What do we need to bring?

- Containers to collect found objects in
- Hoops for sorting
- Camera

### Activity

- Collect interesting leaves, twigs, seeds and stones in the woodland.
- In groups, sort the items according to their properties. This could be colour, shape, texture, weight or whatever you can think of! Use hoops to sort objects into different groups.
- Compare objects. What is the same about them and what is different? Can you order objects from the biggest to the smallest? What about the heaviest to the lightest?

### Where can we do it?

Woodland

### What is the best time of year?

Spring, Summer and Autumn

### Follow up activity

- Use your found objects to create artworks and label them with descriptive adjectives.
- Make a simple 3D graph using the found objects
