

Share your plants

Are you overwhelmed with seedlings after your spring sowing? Why not share your plants with your neighbourhood!

We've collaborated with **Project Grow** to bring you these handy plant tag templates, so that you can pass on your plants and give their new owners all the tips and information needed to nurture them.

Hole punch your tag here and attach a string to your pot or plant

Write your plant name here

Tick / circle the relevant care instructions that apply to your plant

Top tip!

Use the **RHS Find a plant** tool to find care information for your plants if you're unsure

Top tip!

Why not print your tags onto coloured paper or card to draw attention to the plants for their new owners?

MOSTLY SHADE

MOSTLY DRY

BRIGHT INDIRECT
