How to complete your herbarium label

Write the name of your plant and its variety, if you know it.

Describe the location you found your plant growing in. Is it in a pot or container, or in the ground? Maybe it's growing somewhere unexpected.

Our community herbarium

Plant and variety: Fennel 'Di Firenze'

Location: Raised beds next to wall, Sunny Hill Community Garden, H1L L12

My seeds are/plant is from: Seeds provided by RHS Grow With It

Plant height: 143cm Plant width: 32cm

Scent: Aromatic, aniseed-y, herbal

Description (stem, leaves, flower):
Five thick pale green stems extending from soil, with thin, dark green feathery fronds on top

Collected by: Anon

 **RHS**

Date: 6 Aug 2024

Take measurements of your plant's height and width.

Did you grow your plant from seed, or purchase it as a young plant? Perhaps it was gifted to you by someone, or is growing there accidentally.

Add your name to the label - this could be the name of your class or group - and add the date that you collected your plant

Observe and take notice of your plant. Describe its smell, and the appearance of its stem, leaves and flowers. What colour are they? What shape are they? Do you notice anything else?
