

# Make an origami seed packet

Follow these easy steps to make an origami packet for your seeds, to be shared, swapped and stored safely.

1

Recycle a page from an old gardening magazine or use some sheets of scrap paper for this activity.

2

Turn the rectangle into a square by folding and cutting off the excess paper.

3

With the fold at the bottom and right angle at the top, fold one of the corners across the middle to the other side.

4

Fold the lower corner across the top to the opposite corner.

5

After filling the seed packet with seeds, fold down the top and secure with a paper clip.

6

Don't forget to label the seed packet and the expiry date for the seeds.
