

APPLICATION FOR REGISTRATION OF A LILY NAME (Cultivar epithet or Cultivar Group epithet)

Registration should occur before the name is published or disseminated in any way. There is no charge for registration. This form, duly completed, should be sent to Duncan Donald, RHS International Registrar, 16 Midtown of Inverasdale, Poolewe, Ross-shire IV22 2LW, UK, or e-mailed to lilyregistrar@rhs.org.uk. Forms are also available online at https://www.rhs.org.uk/plants/plantsmanship/plant-registration/lily-cultivar-registration.

Names already listed in the latest edition of The International Lily Register and Checklist or its Supplements must not be re-used and are not acceptable for registration. Names proposed should be in accordance with the latest edition of the International Code of Nomenclature for Cultivated Plants. Advice or details of these publications may be obtained from the International Registrar.

Accepted registrations will eventually be published in the Lily Register or its Supplements, but registrants should be aware that, until a name is published, it has no nomenclatural priority. Therefore, following registration, registrants may wish to ensure that the name (accompanied by a description) is published as soon as possible: if this is done, please inform the Registrar.

Good colour photographs (prints, transparencies or digital images) and, if practicable, a pressed specimen, are very helpful and greatly appreciated. These, with this form, will enable an accurate description to be drawn up and provide a definitive "standard portfolio" for future reference. The copyright of the image remains with the registrant. If you are not the copyright holder or have further questions, please ask the International Registrar for advice or a copy of the Image donations' agreement form. Herbarium (pressed) specimen sent [] Yes [] No [] To follow Photo(s) sent [] Yes [] No Are you willing for these photos/specimens to be deposited in the RHS Herbarium at Wisley Garden for a standard portfolio for this cultivar? [] Yes [] No If you are the copyright holder of the image(s), please sign and date the following consent:

I confirm I am the copyright holder and agree to the International Cultivar Registration Authority for Lilium making use of these images for any scientific or educational purpose in relation to the registration and correct naming of plants, whether through electronic or printed media.

PERSONAL DATA

What we do with your personal data.

In completing and submitting a cultivar registration form you are supplying the Royal Horticultural Society, as International Cultivar Registration Authority (ICRA), with information that identifies you (“personal data”) [though not if the registration is submitted in the name of an organisation, such as a commercial nursery].

By registering your plant with the RHS ICRA you agree to:

- The RHS ICRA retaining your personal data (including your name and contact details) on our plant registration database
- This information being retained as a permanent record of your registration
- The publication of your name and abbreviated address (home town, county/state and country) in print and online in connection with ICRA registration

The ICRA undertakes to hold all such personal data securely, in line with the RHS Privacy Statement.

I agree to the terms laid out above

Change to the format of published entries in the Register & Checklist

Following the implementation of the European Union General Data Protection Regulation [GDPR] in May 2018, in order to comply we have had to make changes to the information we provide in the entries for cultivar registrations.

For any cultivar that is registered with the RHS as ICRA, from now on we will only publish the name and abbreviated address of the registrant. The name of any other individual involved in the development of the cultivar (selector, raiser, introducer, the person who first flowered it, or named it) will be withheld if they are not the same as the registrant. As a result these roles will no longer be included in published registration entries.

We will continue to store this information if it is provided by the registrant but will not be able to supply that information in response to enquiries unless required for legal or compliance purposes.
