REGULATIONS FOR COMPETITIVE EXHIBITS

Exhibitors

1. **Eligibility** - All persons, whether members of the Society or not, are invited to compete, unless excluded by some special regulation. On all questions regarding the eligibility of a competitor, the decision of the Shows Director on behalf of the Council shall be final.
2. **Definition of a daffodil "Amateur"** - For the purposes of these Schedules, a daffodil exhibitor is an Amateur when the exhibitor does not earn remuneration from the daffodil trade and neither the exhibitor, nor anyone living at the exhibitor's address, issues a catalogue of daffodil bulbs for sale.
3. **Definition of a daffodil "Novice"** - For the purposes of these Schedules, a Novice is an exhibitor who, at the end of the last daffodil season, had not won five first prizes in RHS daffodil classes. However, there is an exception for anyone entering Novice classes for the first time. They may enter the Novice classes throughout the year and for the following two calendar years irrespective of the number of first prizes won in the Novice section only.

Entries and Exhibits

4. **Entry forms** - All entries should be made on the official entry forms which accompany these schedules. Additional copies may be obtained from the RHS Shows Department.
5. **Entry fees** - There are no entry fees.
6. **Submission of entries** - All entries must be sent to:-

**The Shows Department,
The Royal Horticultural Society,
80 Vincent Square,
London.
SW1P 2PE**

to arrive no later than noon, five days before the Show or Competition but, at the discretion of the Shows Manager, entries for "Individual Bloom" classes only may be accepted at any time up to and including the day before the Show or Competition and should be submitted by telephone or email or:-

Tel: **020 7821 3142**

Email: **georginabarter@rhs.org.uk**

7. **Acceptance of entries**- The Council reserves the right to authorise its Shows Manager to refuse any entry and, in the event of any such refusal, is not required to give a reason or explanation for so doing.

8. **Number of entries allowed:-**
Daffodils: Competitors may not enter more than one exhibit in any class, except those classes in which more than one entry is specifically allowed. These classes are so designated in the schedule.
Hyacinths and Tulips: Competitors may enter more than one exhibit in any class, providing that each is a different cultivar.
9. **Exhibits must be the property of the exhibitor** - All blooms exhibited in competitive classes must have been grown by competitors on land in their own occupation (*But see Regulation 10 below*) and any prize gained in contravention of this regulation shall be forfeited. In order to satisfy itself that competitors are complying with this regulation, the Council reserves the right to have gardens from which blooms have been entered for competition visited by commission, before or after a Show or Competition.
10. **Overseas exhibitors** - Regulation 9 does **not** apply to competitor's resident outside the British Isles when entering classes for daffodils bred and raised by the exhibitor.
11. **Unattended exhibits** - The Society's officers will unpack and stage an exhibit, providing that the Shows Department has been notified beforehand of its arrival date and of the owner's inability to accompany it. However, the Society cannot be responsible for its re-packing and return. A person sending an exhibit must use labels provided by the Society to identify each daffodil or tulip and place inside the top of the box, a card on which the name and address of the sender is printed or written clearly. Such exhibits must arrive not later than the day before the show.

Classification of Daffodils and Tulips

12. **Daffodils:** - Whenever the word "Division" occurs in the Schedule, it refers to the corresponding Division in the Society's System of Classification. The International Daffodil Register and Classified List (2008) and subsequent Supplements give the classification by Division of all daffodils registered with the Society up to the date of publication and a daffodil must be exhibited in accordance with the latest Division published for it. Where a daffodil is said to vary between two Divisions, it must be exhibited in classes designated for its primary classification.
13. **Tulips:** - The 1996 edition of the *Classified List and International Register of Tulip Names*, as amended by any subsequent supplements, gives the classification of all tulips registered with the Royal General Bulb growers' Association of The Netherlands up to the date of publication and a tulip must be exhibited according to the classification given for it therein.

Meanings and Definitions

14. **"Cultivar"** - For the purposes of these schedules, the term "cultivar" refers to all daffodils and tulips other than species and wild hybrids.
15. *Reserved*
16. **"Intermediate" and "Miniature"** - Minimum and maximum diameters of individual blooms are as follows:
Intermediate - Maximum 80mm, Minimum 51 mm
Miniature - Maximum 50 mm
Undersized blooms of "standard daffodils" shown as Intermediates will not be judged. A judge may measure intermediate and miniature daffodils that appear not to conform to the stated definition.

17. **"Rim"** - Rimmed daffodils are those which display at the corona rim a distinct and clearly defined band of colour which is different from the colour or colours of the corona base and mid-zone.
18. **Perianth and Corona colour** - Where a class requires blooms to have a yellow, orange or white perianth or corona, the perianth or corona must be predominantly, but not necessarily exclusively, that colour.
19. **"In Commerce"** - For the purposes of these schedules, the term "In Commerce" means that the daffodil has been offered for sale under a name, in either a wholesale or a retail catalogue, at some time before the current year.
20. **"Bloom"** - The term used for both **single** and **multi-headed** flowers.

Staging

21. **Times for staging** - Timetables for staging may be found at the beginning of the schedule for each particular show or competition.
22. **Positioning of exhibits** - The Society's officers will direct the placing of all exhibits.
23. **Vases** - The Society provides vases for the competitive classes and no others may be used. For daffodil classes they should be used as follows:

Individual bloom classes (including collections)	7 inch Bikini vases
Miniature bloom classes	Bikini or glass vases
Classes for three or more blooms (except miniatures)	11 or 12 inch Bikini vases

24. **Tiers and drapery** - For the competitive classes, tiers and drapery are provided by the Society and only these may be used for competitive exhibits.
25. **Staging** - Competitors are reminded of the importance of good staging and of the need to use clean, healthy foliage. Points may be deducted for poor staging or the use of dirty or diseased foliage. An experienced exhibitor is available to advise novice exhibitors.

26. **Foliage:** -

Daffodils: The use of foliage is optional but, if used, it must be daffodil foliage, although it need not be that of the daffodil being shown.

Tulips: Tulips should be exhibited with their own foliage unseparated from the stem.

Additional unattached leaves should not be placed in the vase.

27. **Arrangement of flowers** - Only one daffodil may be exhibited in a vase, unless more than one is required or permitted in the schedule. Except in classes for hyacinths, artificial supports are forbidden and exhibits of daffodils or tulips found to contain any such items will be disqualified. Supports are permitted in all classes for hyacinths. The ends of stems must be in water.
28. **Floral Foam** - Floral foam may not be used as a staging material due to concerns about its non-biodegradability and disposal. Alternative biodegradable staging materials include sustainably sourced moss and newspaper.

29. **Labelling of exhibits** - All exhibits, apart from those in the Summer Bulb Competition, must be labelled. The label for an unnamed seedling should bear its number. If a name is not known, the label should bear the words "Name Unknown". Names and numbers should be typed or written clearly on the cards provided by the Society, using capital letters for names. However, for classes comprising five or more blooms in one vase, the Society's label cards need not be used. An exhibit will not be disqualified because of an error in naming but, in close competition, judges will favour correctness and distinctness of naming.

Competitors must state on their entry forms the number of labels required and these will be posted to them with the acknowledgement of their entries.

30. **Entry cards** - Entry cards may be obtained from the Steward in the Hall during the afternoon preceding and on the day of the show, but before the end of staging. Competitors are responsible for ensuring that the details shown on the cards are correct, and for placing the cards against the respective exhibits before judging begins. Any entry without an entry card will not be judged.
31. **Non-competitive exhibits** - Those wishing to stage non-competitive exhibits of daffodils or tulips should contact the Shows Department for further information and application forms.

Judging

32. **Rules for judging** - The rules in the Horticultural Show Handbook will be used where applicable.
33. **Scales of points for judging daffodils -**

In classes for more than one vase, each vase should be judged and marked individually. Before this is done, the exhibit as a whole should be marked out of an additional 10% of total points for visual impact, coverage of divisions and colour combinations. For example, in a class of six vases of single blooms, judges should mark out of 10 for each vase, total 60 points, having first marked out of an additional 6 points (10%) for impact of the group and diversity.

When the vases are judged, the following scales of points will be used:

	A vase of three Or more blooms	One bloom in a vase
Form & Poise	3 points	3 points
Colour	2 points	2 points
Condition & Texture	2 points	2 points
Size (for variety)	1 point	1 point
Stem(s)	1 point	1 point
Presentation	1 point	1 point
Uniformity	2 points	-
<hr/>		
TOTALS	12 points	10 points

Attention is drawn to the minimum and maximum diameter of individual blooms as stated in Regulation 16.

34. **Decisions** - The decisions of the judges concerning the relative merits of exhibits shall be final, but the Council reserves to the Referees and to itself decisions upon any other matters in dispute, especially cases of nomenclature, when specimens may be withdrawn for further inspection.
35. **Withholding of prizes** - Any prize may be modified or withheld if the exhibit is considered to be of insufficient merit.
36. **Protests** - Any protest must be delivered in writing to the Shows Department by 1.30 p.m. on the first day of the Show or Competition.
37. **Alteration of exhibits** - After judging has taken place, no exhibit or part of an exhibit may be altered or removed until the end of the show, except with the permission of the Shows Manager.

Administration.

38. **Clearing exhibits** - Exhibitors wishing to retain blooms or other items from their exhibits, may remove them during the period specified in each show/competition time-table, but not before, except where so indicated in a schedule. Exhibitors must have provided themselves with sufficient help to ensure the safety of their goods, as Society officers may not always be available to help.
39. **Award cards** - Cards for entries placed first, second or third, if not removed by exhibitors at the end of the Competition or Show, will be collected by officers of the Society and posted to the exhibitors.
40. **Perpetual trophies** - Challenge cups will be presented to the winners in an award ceremony at the competition and retained by the Society afterwards.
41. **Liability for loss** - All exhibits, personal property, etc., left on Society premises by competitors will be left at their own risk and the Society will not be liable to compensate them for loss or damage arising from theft, fire, water, accident or any other cause whatsoever.
42. **Compensation for injury** - Competitors will be wholly responsible for claims made by their own employees under the Common Law or under any statute for compensation for injury arising out of, or in the course of, their employment. The Society has no responsibility to any but its own employees.
43. **The Usual Regulations** - The Show or Competition will be subject also to the Society's usual regulations, except on points where, because of the schedule, they do not apply.
(See "Regulations for The Society's Exhibitions" and "The Horticultural Show Handbook".)

DAFFODIL CLASSIFICATION SYSTEM

Competitors should note that the following system of classification is used in this Schedule

1. The Classification of a daffodil shall be that which was submitted by the person registering it, or shall be based on the description and measurements submitted by such person.

2. The Classification shall consist of a division number and a colour code (e.g. 1 Y-Y, 2YYW-Y, 3 W-WWR, 11b W-W/OY).

3. The numbered divisions in which a daffodil cultivar may be placed are defined and illustrated on pages 9-13 of this Schedule

4. Measurements taken in determining between Divisions 1, 2, and 3 will be those of the flower at maturity. The length of the perianth segments is the measurement from the tip of one segment when flattened out to the base of the corona. The length of the corona is the measurement from the base of the perianth segments to the furthest margin of the corona.

5a) The colours and equivalent code letters that may be used to describe a daffodil cultivar will be those of the flower at maturity. They are as follows:

White or whitish	W
Pink	P
Green	G
Orange	O
Yellow	Y
Red	R

In distinguishing Yellow from Orange in daffodil classification, borderline colours including and on the green side of RHS Yellow-Orange Group 15 are said to be Yellow; those including and on the red side of Yellow-Orange Group 16 are Orange. In distinguishing Orange from Red in daffodil classification, borderline colours including and on the yellow side of RHS Orange Group 29 are said to be Orange, those including and on the purple side of Orange-Red Group 30 are Red.

b) The colour code shall consist of two letters, or two groups of letters, separated by a hyphen: the letter(s) before the hyphen shall describe the perianth segments (the 'petals'); the letter(s) following the hyphen shall describe the inside of the corona (the 'trumpet' or 'cup').

c) For purposes of description, the perianth segments shall be divided into three zones – outer zone, mid-zone and base; and the corona into three zones – base, mid-zone and rim; unless the colours are non-concentric.

d) If the perianth segments are substantially of a single colour, a single code letter shall describe them; if they are of more than one colour, three code letters shall be used, describing the outer zone before the mid-zone and base; or if the colours are non-concentric, describing the predominant colour first, followed by an oblique line, then the non-predominant colour(s) in any order.

Note: If a cultivar is registered with more than one colour in the perianth segments, the major area of colour shall determine the class in which it may be shown. For example, although they have white perianths, cultivars registered 2YYW-W may be shown in a class requiring those which are 2 Y-W.

e) If the corona is substantially of a single colour, a single code letter shall describe it; if it is of more than one colour, three code letters shall be used, describing the base before the mid-zone and rim; or, if the colours are non-concentric, either two or three code letters shall be used, describing the predominant colour first, followed by an oblique line, then the non predominant colour(s) in any order.

f) In double daffodils the code letter(s) before the hyphen shall describe not only the perianth segments but also any extra petaloid segments of the same colour, even if they are interspersed with the corona at the centre of the flower, the code letter(s) following the hyphen shall describe the corona or segments of the corona. Multiple letters before or after the hyphen shall in doubles, as in all other daffodils, indicate that there is more than one concentric or non-concentric colour in the perianth and petaloid segments or in the corona or segments of the corona.

Note: If a double daffodil is registered with more than one colour in the segments of the corona, the major area of colour shall determine the class in which it may be shown. For example, although they have yellow in the corona segments, cultivars registered 4 Y-YOR may be shown in a class requiring 4 Y-O or 4 Y-R

1. This Guidance for Judges is intended primarily to assist inexperienced judges of daffodils and judges of other plants who are called upon to judge daffodils. It is based to a certain extent upon the responses of 100 experienced UK daffodil judges to a questionnaire about faults sent out in November 1999. A summary of these responses was published in the Daffodil and Tulip Year Book 2000-2001.
 - 1.1 Judging is always to some extent subjective. It is not possible to devise a points system by which points are fed into a computer which will then produce an acceptable result. If it were possible there would be little need for judges.
 - 1.2 It is not possible to categorise faults in order of seriousness. In most cases it is a question of degree.
 - 1.3 Judging by comparison of faults is not the right approach. Flowers should be judged on their good qualities first, and only then should the seriousness of defects be assessed. A poor specimen of a daffodil is a poor daffodil. An exceptionally good specimen of any daffodil must still be judged dispassionately against the other exhibits and extra credit should not be given to a good specimen of an inferior daffodil.
 - 1.4 There are some matters on which it is not possible to give specific guidance. In particular a flower should be elegant with good proportions, but no definition of elegance or proportion can be given as both are to some extent subjective.
 - 1.5 In classes for more than one vase, each vase should be judged and marked individually. But before this is done, each exhibit as a whole must be judged on presentation and marked for visual impact, coverage of divisions and colour combinations.
 - 1.6 The guidance offered is that which was agreed by the Daffodil Show Schedule Panel of the Royal Horticultural Society.
2. The following may be regarded as good features of an exhibition daffodil:
 - 2.1 Symmetry of petals
 - 2.2 Symmetry of corona
 - 2.3 Petals uniformly spreading or slightly reflexed
 - 2.4 Petals plane (flat) or slightly incurved at the margin
 - 2.5 Any halo of another colour on petals well defined
 - 2.6 Colours of petals and corona clear
 - 2.7 Any different colour zones of corona well defined
 - 2.8 Petals of solid substance and silky texture
 - 2.9 Good poise - axis of corona at right angle to stem
 - 2.10 Flower fresh but well developed, without signs of ageing
 - 2.11 Elegant shape and proportion

3. The following may be regarded as poor features:

- 3.1 More or fewer than six petals on each flower or floret
- 3.2 Petals torn or nicked or otherwise imperfect
- 3.3 Petals with prominent ribs
- 3.4 Petal misplaced - i.e. inner petal partly behind outer petal
- 3.5 Petals significantly reflexed, inflexed or incurved (unless required by the show schedule)
- 3.6 Base of petals stained with colour of corona
- 3.7 Petals significantly twisted
- 3.8 Defect in petal not visible from the front
- 3.9 Petals too narrow
- 3.10 Petals of poor substance or texture
- 3.11 Corona torn or damaged
- 3.12 Corona with blobs, spots or flecks of another colour
- 3.13 Corona unevenly serrated or lobed
- 3.14 Corona not round or symmetrical
- 3.15 Corona faded or burnt
- 3.16 Corona axis not at right angle to perianth axis
- 3.17 Any part of flower trimmed
- 3.18 Flower dirty, diseased or harbouring pests
- 3.19 Flower or stem damaged by pests or disease
- 3.20 Weak colour
- 3.21 Flower undersized for the daffodil
- 3.22 Flower not "clocked"
- 3.23 Pollen disturbed or anthers misshapen
- 3.24 Flower showing signs of ageing
- 3.25 Stem twisted, curved or weak
- 3.26 Flower not showing the features regarded as good

4. The following may be regarded as neither good nor poor features

- 4.1 Corona cylindrical, with no flange ("stovepipe")
- 4.2 Long neck (i.e. pedicel) provided that poise is good
- 4.3 Registered flower not measuring the Division in which it is registered

5. The features which may be regarded as good and poor apply to flowers from all of Divisions 1-13 with the following exceptions:
- 5.1 Division 4 - double flowers
 - 5.1.1 Additional poor features are an “open” centre i.e. the absence of petaloid or corona segments in the centre of the flower and lack of a rounded profile
 - 5.1.2 Good feature 2.5 does not apply
 - 5.1.3 Poor feature 3.6 does not apply and both 3.1 and 3.5 apply only to the outer whorl of petals
 - 5.2 Divisions 5-13
 - 5.2.1 An additional good feature of a flower having three or more florets is that the florets are symmetrically arranged.
 - 5.2.2 Good features 2.3, 2.4 and 2.9 do not apply
 - 5.2.3 Poor feature 3.5 does not apply
 - 5.3 Divisions 5 and 6
 - An additional good feature (replacing 2.3) is:
Petals significantly reflexed
 - 5.4 Divisions 10 and 13
 - Poor features 3.7 and 3.9 do not apply
 - 5.5 In Divisions 4, 5, 7, 8, 11 and 12 on stems carrying more than one floret all florets should be uniform
 - 5.6 In classes calling for more than one stem in a vase all the flowers should be uniform and in classes calling for more than one vase Judges should look for a good balance of colours and good coverage of Divisions (when appropriate) and diversity

*Technical terms used in this Guidance are as defined in:
